ADMISSIONS OPEN - 2020

Neerukonda, Mangalagiri Mandal, Guntur District, Andhra Pradesh - 522502.

The SLABS undergraduate programme is developed to enable our students to become effective citizens. We offer an innovative curriculum founded on the idea that world-class education should expose them to effective communication and critical thinking skills, and a foundation in English, History, and the Basic Sciences (including Computer Science). This empowers them to effectively engage with civil society on any issue and to adapt to an ever-changing global demand.

All undergraduate degree programmes in the School of Liberal Arts and Basic Sciences include 6 mandatory Foundation Courses in English, History, Psychology, Biology, Statistics, and Environmental Science. Besides learning skills to help them be job-ready in their chosen specializations, this interdisciplinary foundation will equip the students to compete in the international workplace.

The three-year programmes can be extended to a four-year Diploma/Certificate course for students interested in pursuing their higher studies in the US. The four-year programme includes relevant courses and a project at SRM-AP, or a semester/year abroad for 40 credits.

WHY SLABS AT SRM-AP?

Discover abundant career options to choose from: Liberal Arts and Basic Sciences equip you with multiple skills and consequently give you an edge to work in multiple environments. Choose to become an economist, a policy analyst, an advertising professional, a physicist, a mathematician, a biologist, a chemist, a psychologist or a historian.

Unlock international career and postgraduate opportunities through a degree that is recognized globally.

One degree; many skills: You will be offered a well-rounded treatment of the subject, covering both theoretical and applied aspects. The array of available courses creates an unrestricted environment for you to learn and expand your breadth of knowledge and skills.

Be favoured by today's employers: Recent employment surveys indicate that multinationals including technology behemoths like Google require candidates with a wide range of skills and capabilities, and prefer those with liberal arts degrees.

Get exposure to programming languages and tools needed to develop AI & ML-based applications, and for storing and analysing large data, for a wide range of industries.

Equip yourself to be successful in competitive examinations for higher studies and employment like UPSC, GRE, JAM, SSC, etc.

Up to 100% scholarship will be provided to meritorious students as adjudged by a committee.
