## OVERVIEW

Economics is the study of how individuals and firms and governments make decisions in the face of constraints. For example, deciding what to buy, when to buy, where to work, how many people to employ, how much to produce, whether to increase the tax rate, are all decisions that have important implications for the welfare of households, firms and the economy. Amartya Sen, Dr. Manmohan Singh, former RBI Chief Raghuram Rajan have all made their place in the great echelons of Economists. Their contributions have left an indelible mark on the society, and you can follow in their illustrious footsteps.

Currently for students in high school, an important and immediate decision is what degree to pursue in college. The decision to come to college is based on aspirations and dreams about working in a stimulating environment and contributing to improving both individual welfare and societal welfare.

The Economics program at SRM AP seeks to draw students who have a desire to learn and train in a department that invests almost exclusively on the ultimate goal of students entering jobs or careers where they are likely to make long-lasting contributions in either policy making or research careers. Along with Foundation Courses and optional Minors across other departments, we ensure that the education imparted is justly multidisciplinary.

As a discipline, it combines student's ability in mathematics along with their deep curiosity in understanding how the world functions and behaves. This unfettered thinking has led undergraduate economics majors into a genuine interest in making the world a better place - attributes that define a Rhodes' scholar.

## SCOPE AND CAREER OPPORTUNITIES

B. Sc. (Hons) in Economics is also ideal preparation for MBA in India and abroad. Graduates can also have a head start in their careers in interesting job profiles in the field. It should come as no surprise that many of Rhodes scholars - the most prestigious scholarship offered at the end of an undergraduate degree both in India and abroad have chosen Economics as their undergraduate major.

## WHY STUDY ECONOMICS AT SRM AP?

The main objective of the programme is to equip the students with theories and tools of economic analysis in major areas of its application and focus on the emerging area of Economics. The vision of department is to create individuals who are globally oriented in thinking and who can adapt a multi-dimensional approach to complex issues impacting business, society, nation, and the world.
