

Curriculum and Syllabus
(Applicable to students admitted during AY 2020-21)

B. Tech Civil Engineering

School of Engineering and Sciences

Department of Civil Engineering
SRM University, AP- Andhra Pradesh

Curriculum
B. Tech Civil Engineering Curriculum

SEMESTER I					
Course Code	Course Name	L	T	P	C
EGL 101	Communicative English	3	0	0	3
PHY 101	Engineering Physics	3	0	0	3
PHY 101L	Engineering Physics Lab	0	0	2	1
CHE 101	Principles of Chemistry	2	0	0	2
CHE 101L	Principles of Chemistry Lab	0	0	2	1
MAT 112	Single Variable Calculus	3	0	0	3
ENV 111	Environmental Science	2	0	0	2
ENV 111 L	Environmental Science Lab	0	0	2	1
CSE 105	Introduction to Programming Using C	3	0	0	3
CSE 105 L	Introduction to Programming Using C Lab	0	0	2	1
ISES 101	Industry Specific Employability Skills	1	1	0	1
TOTAL		17	0	8	21

SEMESTER II					
Course Code	Course Name	L	T	P	C
ENG 115	Engineering Mechanics	3	0	0	3
CSE 107	Data Structures	3	0	0	3
CSE 107 L	Data Structures Lab	0	0	2	1
ECO 121	Principles of Economics	3	0	0	3
MAT 121	Multi variable Calculus	3	0	0	3
EGL 125	HS Elective Critical Thinking	4	0	0	4
HIS 100	Idea of India	4	0	0	4
ME 103 L	Mechanical Engineering Tools (Workshop)	0	0	2	1
ENG 105	Engineering Graphics	1	0	2	2
CE 204	Engineering Geology	3	0	0	3
CE 204 L	Engineering Geology Lab	0	0	2	1
ISES 102	Industry Specific Employability Skills II	1	1	0	1
TOTAL		21	1	6	25

SEMESTER III					
Course Code	Course Name	L	T	P	C
CE 209	Fluid Mechanics	3	0	0	3
CE 203	Strength of Materials	3	0	0	3
CE 203 L	Strength of Materials Lab	0	0	2	1
CE 206	Surveying	3	0	0	3
CE 206 L	Surveying Lab-I	0	0	2	1
MAT 131	Differential Equations	3	0	0	3
CE 208	Building Planning & Drawing using CAD	3	0	0	3
OE	Open Elective	3	0	0/2	3/4
ISES 201	Industry Specific Employability Skills III	1	1	0	1
CSE 230	Industry standard Coding Practice 1	0	0	4	1
TOTAL		16	1	6	21/22

SEMESTER IV					
Course Code	Course Name	L	T	P	C
CE 201	Concrete Technology	3	0	0	3
CE 201L	Concrete Technology Lab	0	0	2	1
CE 210	Structural Analysis	3	0	0	3
CE 309	Engineering Hydrology	3	0	0	3
CE 211L	Surveying Lab-II	0	0	2	1
MAT 221	Probability and Statistics for Engineers	3	0	0	3
CE 209 L	Fluid Mechanics and Hydraulic Machinery Lab	0	0	2	1
CE 205	Geotechnical Engineering - I	3	0	0	3
ISES 202	Industry Specific Employability Skills IV	1	1	0	1
CSE 330	Industry Standard Coding Practice 2	0	0	4	1
TOTAL		16	1	12	20

SEMESTER V					
Course Code	Course Name	L	T	P	C
CE 202	Reinforced Concrete Design	3	0	0	3
CE 302	Geotechnical Engineering- II	3	0	0	3
CE 302 L	Geotechnical Engineering Lab	0	0	2	1
CE 306	Water Resources Engineering	3	0	0	3
CE 207	Transportation Engineering	3	0	0	3
CE 308	Environmental Engineering	3	0	0	3
CE 207 L	Transportation Engineering Lab	0	0	2	1
ISES 301	Industry Specific Employability Skills V	1	1	0	0
CSE 331	Industry Standard Coding Practice 3	0	0	4	1
TOTAL		18	0	8	21

SEMESTER VI					
Course Code	Course Name	L	T	P	C
CE 310	Estimation and Costing	3	0	0	3
TE	Technical Elective	3	0	0	3
CE 401	Design of Steel Structures	3	0	0	3
CE 308 L	Environmental Engineering Lab	3	0	0	3
CE 303	Construction Engineering and Management	3	0	0	3
CE 501	Design Project	0	0	4	2
ISES 302	Industry Specific Employability Skills VI	1	1	0	0
OE	Open Elective	3	0	0/2	3/4
TE	Technical Elective	3	0	0	3
TE	Technical Elective	3	0	0	3
TOTAL		18	0	6	24/25

SEMESTER-I

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
EGL 101	Communicative English	HS	3	0	0	3

UNIT I: RHETORIC AND PUBLIC SPEAKING

Rhetoric, Critical thinking and public speaking, thinking outside the box, how to deliver a speech, Fundamentals of persuasion.

UNIT II: NON-VERBAL COMMUNICATION

Nonverbal communication, Spatial distance, Eye contact and appearances, Eye contact and appearances.

UNIT III: COMMUNICATION AND THE MEDIA

Persuasion and the media, Radio, television, film, Social media and the internet, How the media sells the ideas, images, products, Informative/scientific speeches and research, Heart of the speech, powerful narratives, Power of narrative.

UNIT IV: SMALL GROUP COMMUNICATION

Leadership, conflict and persuasion in group, Leadership, conflict and persuasion in group, Moment of Inertia by analytical method, Group problem solving, learning to say no.

TEXTBOOKS

1. Communication: Principles for a Lifetime. Beebe, Beebe and Ivy, Sixth Edition, Pearson Publishing.

REFERENCE BOOKS/OTHER READING MATERIAL

2. Qualitative Communication Research Methods (2011) Bryan C. Taylor and Thomas R. Lindlof. Sage Publications, New Delhi, India, 3rd Edition
3. The Fundamentals of Small Group Communication (2008) Scott A. Myers and Carolyn M. Anderson. Sage Publications, New Delhi, India.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
PHY 101	Engineering Physics	BS	2	0	0	2

UNIT I: INTRODUCTION TO VECTOR ALGEBRA

Introduction to vectors, scalar and vector product, Gradient of a scalar field, Divergence and Curl of vector fields and their physical significance, Gauss and Stokes theorems, Coordinate systems – introduction to Cartesian system, Spherical and Cylindrical coordinate systems.

UNIT II: ELECTROSTATICS

Coulomb's law and electric field, Gauss Law, Electric Potential, Potential Energy, Conductors under Electrostatic Equilibrium, Capacitors.

UNIT III: DIELECTRICS AND POLARIZATION

Introduction to Electric Dipole and dipole Moment, Potential and field due to electric dipole, Polarization in dielectrics, Modification of Gauss's Law in terms of electric displacement, Electric Susceptibility and dielectric constant, Bound charges.

UNIT IV: MAGNETO STATICS

Magnetic force and cyclotron, Biot-Savart Law for magnetic fields, Biot-Savart Law for magnetic fields, Ampere's circuital law, Equation of Continuity, Magnetization in Materials.

UNIT V: INTRODUCTION TO ELECTRODYNAMICS

Introduction to time-varying fields, Faraday's law of induction, Generalization of Ampere's law, Maxwell's equations, Derivation of wave equation, Planar Waves in free space.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
PHY 101 L	Engineering Physics Lab	BS	0	0	2	1

LIST OF PRACTICAL EXPERIMENTS

1. Revisions of Vernier caliper and Screw Gauge measurement methods.
2. Plotting experimental data in graphs and error analysis.
3. To determine the moment of inertia of a flywheel
4. (a) Measurement of time period for a given compound pendulum with different lengths.
5. (b) To determine radius of gyration of a given pendulum.
6. Verification of Stefan`s Law.
7. Measurement of specific heat capacity of any given material.
8. Verify of Hooke`s law and to determine spring constant for given spring combinations.
9. To determine the rigidity modulus of steel wire by torsional oscillations.
10. To calculate Young`s modulus of a given material by deflection method.
11. a) To measure the capacitance as a function of area and distance between the plates.
12. b) To determine the dielectric constant of different dielectric materials.
13. (a) Measurement of the induced voltage impulse as a function of the velocity of the magnet.
14. b) Calculation of the magnetic flux induced by a falling magnet as a function of the velocity of the magnet.
15. a) To study the magnetic field along the axis of a current carrying circular loop.
16. b) To study the dependency of magnetic field on the diameter of coil.
17. (a) To investigate the spatial distribution of magnetic field between coils and determine the spacing for uniform magnetic field.
18. b) To demonstrate the superposition of the magnetic fields of the two individual coils.
19. Study of B-H-Curve
20. To study permeability curve of a given material.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Physics for Scientist and Engineers, Ninth edition (2017) - Raymond A. Serway, John W. Jewett (Publisher - Cengage India Private Limited)).
2. Physics laboratory manuals.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CHE 101	Principles of Chemistry	BS	2	0	0	2

UNIT I: CHEMICAL BONDING

Ionic, covalent, and metallic bonds. Theories of bonding: Valence bond theory, Nature of covalent bond, sigma (σ) bond, Pi(π) bond, Hybridization: Types of hybridizations, sp², sp³, sp³d, d²sp³, Shapes of molecules (VSEPR Theory): BeCl₂, CO₂, BF₃, H₂O, NH₃, CH₄, PCl₅, XeF₂, SF₆, XeF₄, Molecular orbital theory: Linear combination of atomic orbitals (LCAO Method), Bond order, homo(H₂, O₂, N₂) and hetero nuclear diatomic molecules(NO, CO), Non-covalent interactions: Vander Waals interactions, Dipole-dipole interactions, and hydrogen bonding.

UNIT II: PHASE RULE AND KINETICS

Phase rule: Introduction, Definition of the terms used in phase rule with examples, Application of phase rule to water system, Sulphur system and lead-silver system, Kinetics: Order and molecularity of reactions, zero order, first order and second order reactions.

UNIT III: WATER TECHNOLOGY

Standards for drinking water, Methods of Treatment of water for domestic and industrial purposes: Sedimentation, Coagulation, Filtration, Sterilization. Break point chlorination, Determination of Hardness of water by EDTA method. Demineralization of water, Softening of water: Lime-soda Process, Ion exchange process, Zeolite process, Boiler Troubles: Priming, Foaming, Scale. Sludge, Corrosion, Caustic Embrittlement.

UNIT IV: POLYMER CHEMISTRY

Classification of polymers: Natural and synthetic, Thermoplastic and Thermosetting. Degree of polymerization, Types and mechanism of polymerization: Addition (Free Radical, cationic and anionic), Condensation and copolymerization. Properties of polymers: T_g, Tactility, Molecular weight average, number average and poly dispersity index, Molecular weight average, number average and poly dispersity index.

UNIT V: ELECTROCHEMISTRY

Arrhenius theory of electrolytic dissociation. Classification of electrolytes; degree of Dissociation of acids, Dissociation constant of weak acids. Concept of Ph and pOH, buffer solutions, Solubility product, common ion effect indicators and theory of acid base indicator, Conductance of solutions-specific, molar and equivalent conductance, Variation of molar conductance with dilution for strong and weak electrolytes, Migration of ions-Kohlrausch's law of independent migration of ions. Ostwald's dilution law; Nernst equation for single electrode and electrochemical cells.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Bahl and B. S. Bahl, G. D. Tuli, Essentials of physical chemistry, S Chand Publication, 2014, ISBN: 8121929784. P.W. Atkins, T.L. Overton, J.P. Rourke, M.T. Weller and F.A. Armstrong Shriver and Atkins' Inorganic Chemistry, 5th Ed., Oxford University Press, London, 2010, ISBN 978-1-42-921820-7.

4. J. Bard and L.R. Faulkner, Electrochemical methods –Fundamentals and applications, 2nd Ed., John Wiley and Sons, 2001.
5. Jain P.C. & Monika Jain, Engineering Chemistry, Dhanpat Roy & Sons, 2015.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CHE 101 L	Principles of Chemistry Lab	BS	0	0	2	1

LIST OF PRACTICAL EXPERIMENTS

1. Volumetric titration of HCl vs NaOH.
2. Conductometric titration of HCl vs NaOH.
3. Standardization of potassium permanganate by Oxalic acid.
4. Iodometric Determination of Ascorbic Acid (Vitamin C)
5. Determination of hardness of water by EDTA method.
6. Determination of strength of given hydrochloric acid using pH meter.
7. Estimation of iron content of the given solution using potentiometer.
8. Determination of sodium and potassium by flame photometry.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ENV 111	Environmental Science	BS	2	0	0	2

UNIT I: ENVIRONMENTAL CRISIS AND SUSTAINABLE DEVELOPMENT

Need for environmental science studies Fundamentals of ENV – Atmosphere, lithosphere, hydrosphere, biosphere. Global environmental crisis and its causes, Man-Environment relationship & Interaction, Ecological footprint, Sustainable development.

UNIT II: ECOSYSTEMS

Ecosystem - Structure and functions of an ecosystem, Energy flow in an ecosystem, biomass flow in an ecosystem, food chain and web Ecological Succession, Ecological pyramid, Water cycle, Carbon cycle, Sulphur cycle, Nitrogen cycle, Forest ecosystems: tropical rain forest, coniferous forests, tundra forests, temperate forests, Grasslands and desert ecosystems, Aquatic ecosystems: Freshwater zones, streams, rivers, state of rivers in India, wetlands, Zones in ocean, ocean activities, coastal zones, Estuaries, Mangroves.

UNIT III: RENEWABLE AND NON-RENEWABLE RESOURCES

Energy resources: Global energy crisis, energy sources, energy needs, global energy consumption, Renewable and Non-renewable energy sources: Hydropower, Solar, tidal, wind, energy, Bioenergy, coal, natural gas, Energy resources: fossil fuel vs renewable fuels, peak oil, conventional and unconventional oil, oil price determination, Environmental implications of Energy use: India and world, Energy use pattern – national and global, Water availability, Water for irrigation, water situation in India.

UNIT IV: BIODIVERSITY

Significance of biodiversity, Current state of biodiversity: National and global, Causes of biodiversity loss, Biological hotspots, aquatic biodiversity, Endangered species and endemic species of India, Biodiversity conservation: Seed banks, botanical gardens, marine biodiversity protection, national and international efforts.

UNIT V: ENVIRONMENTAL POLLUTION AND CONTROL

Types of Environmental Pollution Air pollution: Sources, effects, and control Air standards Air pollution in India and the world Sources of air pollution Outdoor & Indoor air pollution Point source, mobile, area source.

Effects of air pollution:

Smog, urban heat island, ozone layer depletion, acid rain.

Controlling air pollution:

Emission regulation, e-cars

Water pollution: Sources & effects Water Quality standards Water pollutants, eutrophication, thermal pollution, bio-magnification Wastewater treatment, Methods of water purification.

Soil pollution: Sources, causes and effects Control of soil pollution: Air purging, phytoremediation, and bio-remediation.

Solid waste management, Types and sources of solid wastes, Hazardous waste, and electronic wastes, Recycling, and management of solid wastes (4Rs), Sanitary landfills and leachate management.

Noise pollution: Sources, effects, and control Air quality standards with respect to noise.

Introduction to Climate change: Impact of climate change, IPCC assessment, Carbon footprint, carbon sequestration, carbon trade, carbon credits, Kyoto protocol, Montreal protocol, Paris agreement. COVID-19: Environmental aspects.

TEXTBOOKS / REFERENCE BOOKS / OTHER READING MATERIAL:

1. R. Rajagopalan (2016). Environmental Studies (3rd edition), Oxford University Press.
2. Deeksha Dave, S.S. Katewa (2012). Textbook of Environmental Studies (2nd edition), Cengage.
3. W. Cunningham, M. Cunningham (2016). Principles of Environmental Science (8th Edition), McGraw-Hill.
4. KL Rao (1979). India's water wealth. Orient Black Swan.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ENV 111 L	Environmental Science Lab	BS	0	0	2	1

WATER QUALITY

1. Turbidity and pH of water.
2. Total suspended solids and total dissolved solids.
3. Measurement of Alkalinity & Acidity.
4. Dissolved oxygen measurement Using Winkler Method & Biochemical Oxygen Demand.
5. Hardness of Water.
6. Iron concentration in water
7. Determination of Chemical Oxygen Demand.

AIR QUALITY

8. Measurement of noise at different sources using Sound Level Meter.
9. Monitoring and analysis of Particulate Matter PM₁₀ in ambient air.
10. Monitoring and analysis of Particulate Matter PM_{2.5} in ambient air.
11. Sampling and analysis of Nitrogen dioxide in ambient air.

SOLID WASTE MANAGEMENT

12. Physical characteristics of Solid wastes – Biodegradable and non-degradable wastes
Determination of Moisture Content (MC), Total Solids (TS), Total Volatile Solids (TVS) and Ash Content(AC) in solid waste.

ENERGY RESOURCES

13. Salt water fuel cell

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
MAT 112	Single Variable Calculus	BS	3	0	0	3

UNIT I: SEQUENCES AND SERIES

Sequences, series, Sum of a series, Geometric series, p-series, Comparison test, root test, ratio test.

UNIT II: LIMITS AND CONTINUITY

Limit of a function at a point, one sided limits, Continuity, Limits involving infinity.

UNIT III : DIFFERENTIATION

Derivative at a point, Derivative as a function, Product Rule, Quotient Rule, Chain Rule, Implicit Differentiation, Rolle's Theorem, Mean Value Theorem.

UNIT IV: APPLICATIONS OF DERIVATIVES

Maxima and minima, Monotonic functions and first derivative test, Related rates, Concavity and curve sketching, Optimization problems, Newton's Method, Taylor and MacLaurin Series.

UNIT V: INTEGRATION

Area as a limit of finite sums, Definite and indefinite integral, Fundamental Theorem of Calculus, Integration by substitution and integration by parts, Area between curves, Arc length.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Thomas' Calculus, 14th Edition, (2018) – J. Hass, C. Heil, M. Weir, Pearson Education.
2. Introduction to Real Analysis, Fourth Edition (2014) – R. Bartle, D. Sherbert, John Wiley and Sons.
3. Calculus and Analytic Geometry, Ninth Edition (2017) – G. Thomas, R. Finney, Addison Wesley.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 105	Introduction to Programming Using C	ES	3	0	0	3

UNIT I: INTRODUCTION

1. Computer systems, hardware and software. Problem solving: Algorithm / Pseudo code, flowchart, program development steps.
2. Computer languages: Machine, symbolic and high-level languages.
3. Creating and Running Programs: Writing, editing (any editor), compiling (gcc), linking and executing in Linux environment.
4. Structure of a C program, identifiers.
5. Basic data types and sizes. Constants, Variables.
6. Arithmetic, relational and logical operators, increment and decrement operators.
7. Conditional operator, assignment operator, expressions.
8. Type conversions, Conditional Expressions.
9. Precedence and order of evaluation, Sample Programs.

UNIT II

10. **SELECTION & DECISION MAKING:** if-else, null else, nested if, examples.
11. Multi-way selection: switch, else-if, examples.
12. **ITERATION:** Loops - while, do-while and for, break, continue
13. Initialization and updating, event and counter controlled loops and examples.
14. **ARRAYS:** Concepts, declaration, definition, storing and accessing elements.
15. One dimensional, two dimensional and multidimensional arrays.
16. Array operations and examples.
17. Character arrays.
18. String manipulations.

UNIT III: MODULAR PROGRAMMING

19. Functions – Basics.
20. Parameter passing.
21. Storage classes extern, auto, register, static, scope rules.
22. User defined functions, standard library functions.
23. Passing 1-D arrays, 2-D arrays to functions.
24. Recursive functions - Recursive solutions for Fibonacci series.
25. Towers of Hanoi.
26. C Pre-processor.
27. Header files.

UNIT IV: POINTERS

28. Concepts, initialization of pointer variables.

29. Pointers as function arguments, passing by address.
30. Dangling memory, address arithmetic.
31. Dangling memory, address arithmetic.
32. Pointers to pointers.
33. Pointers and multi-dimensional arrays.
34. Dynamic memory management functions.
35. Command line arguments.
36. Command line arguments.

UNIT V

37. Structures - Declaration, definition and initialization of structures, accessing structures.
38. Nested structures, arrays of structures.
39. Structures and functions, pointers to structures, self-referential structures.
40. Unions.
41. Typeset, bit-fields.
42. Program applications.
43. Bit-wise operators: logical, shift, rotation, masks.
44. **FILE HANDLING:** Concept of a file, text files and binary files, formatted I/O.
45. I/O operations and example programs.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. The C programming Language by Dennis Richie and Brian Kernighan.
2. Problem Solving and Program Design in C, Hanly, Koffman, 7th ed, PEARSON.
3. Programming in C, Second Edition Pradip Dey and Manas Ghosh, OXFORD Higher Education.
4. Programming in C, A practical approach Ajay Mittal PEARSON.
5. Programming in C, B. L. Juneja, Anith Seth, Cengage Learning.

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 101 L	Introduction to Programming Using C Lab	ES	0	0	2	1

LIST OF SESSIONS:

1. Basic C programs
 - a. Calculation of the area of triangle.
 - b. Find the largest of three numbers using ternary operator.
 - c. Swap two numbers without using a temporary variable.
 - d. Find the roots of a quadratic equation.
 - e. Takes two integer operands and one operator from the user, performs the operation and then prints the result.
2.
 - a. Find the sum of individual digits of a positive integer and find the reverse of the given number.
 - b. Generate the first n terms of Fibonacci sequence.
 - c. Generate all the prime numbers between 1 and n, where n is a value supplied by the user.
 - d. Print the multiplication table of a given number n up to a given value, where n is entered by the user.
 - e. Decimal number to binary conversion.
 - f. Check whether the given number is Armstrong number or not.
3.
 - a. Interchange the largest and smallest numbers in the array.
 - b. Sorting array elements.
 - c. Addition and multiplication of 2 matrices.
4.
 - a. Function to find both the largest and smallest number of an array of integers.
 - b. Linear search.
 - c. Replace a character of string either from beginning or ending or at a specified location.
5.
 - a. Reading a complex number.
 - b. Writing a complex number.
 - c. Addition of two complex numbers.
 - d. Multiplication of two complex numbers.
6.
 - a. Concatenate two strings.
 - b. Append a string to another string.
 - c. Compare two strings.
 - d. Length of a string.

- e. Find whether a given string is palindrome or not.
7. a. Illustrate call by value and call by reference.
- b. Reverse a string using pointers.
 - c. Compare two arrays using pointers.
8. a. To find the factorial of a given integer.
- b. To find the GCD (greatest common divisor) of two given integers.
 - c. Towers of Hanoi.
9. File Operations (File copy, Word, line and character count in a file).
10. Command line arguments (Merge two files using command line arguments).

SEMESTER-I

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ISES 101	Industry Specific Employability Skills	HS	1	1	0	1

UNIT I: QUANTS

Speed calculations, Time and Distance, Problems on Trains, Boats and Streams, Races And Games, Escalator Problems, Time and Work , Chain Rule, Pipes and cistern, Simplification , surds and indices, Square roots and cube roots, Functions.

UNIT II: REASONING

Number Series, Alphabet series, Odd Man Out, Missing number, Wrong number, Analogies, Mathematical Operations, Calendars, Clocks, Cryptarithmic, Identification of Cross-Variable Relation, Sudoku.

UNIT III: VERBAL

Basic sentence structure: Nouns, Pronouns, Adjectives, Parts of speech, Degree of comparison, Articles, conditionals and sentences (kinds), Verb tense, Sentence formation, Paragraph formation, Change of voice, Change of speech, Synonyms, Antonyms.

UNIT IV: COMMUNICATION SKILLS

Self-Introduction, Presentations, Email Etiquette.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Mitchell S. Green – 2017, Know Thyself: The Value and Limits of Self-Knowledge.
2. Debbie Hindle, Marta Vaciago Smith - 2013 , Personality Development: A Psychoanalytic Perspective.
3. Lani Arredondo - 2000, Communicating Effectively.
4. Patsy McCarthy, Caroline Hatcher - 2002, Presentation Skills: The Essential Guide for Students.
5. Martha Davis, Elizabeth Robbins Eshelman, Matthew McKay - 2008, Time Management and Goal Setting: The Relaxation and Stress.
6. Arun Sharma – How to prepare for Quantitative Aptitude, Tata Mcgraw Hill.
7. RsAgarwal,A Modern Approach to Verbal and Non Verbal Reasoning,S.Chand Publications.
8. Verbal Ability and Reading comprehension-Sharma and Upadhyay.
9. Charles Harrington Elstor, Verbal Advantage: Ten Easy Steps to a Powerful Vocabulary, Large Print, September 2000.
10. GRE Word List 3861 – GRE Words for High Verbal Score, 2016 Edition.
11. The Official Guide to the GRE-General Revised Test, 2nd Edition, Mc Graw Hill Publication.
12. English Grammer and composition – S.C. Gupta.
1. 12.R.S. Agarwal – Reasoning.
13. Reasoning for competitive exams – Agarwal.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ENG 115	Engineering Mechanics	ES	3	0	0	3

UNIT I: STATICS OF PARTICLES AND RIGID BODIES

Forces on particles, Resolution of forces, Free body diagrams, Equilibrium of particles, Equilibrium of particles (Numerical Problems), Forces in a plane, Forces in space, Forces in space (Numerical Problems), Forces in space (Numerical Problems), Force equivalence, Force equivalence (Numerical Problems), Rigid body equilibrium, Rigid body equilibrium (Numerical Problems), Rigid body equilibrium (Numerical Problems).

UNIT II: FRICTION

Laws of friction, dry friction, Wedge friction, rolling friction, Belt friction, Belt friction, Screw friction.

UNIT III: ANALYSIS OF TRUSSES AND CENTROIDS

Types of loads, type of supports, reaction, Simple trusses, method of joints, Method of joints, Method of sections (Numerical Problems), Method of Joints (Numerical Problems), Method of Joints (Numerical Problems), Center of gravity-lines, areas, Volumes, Determination of centroid-integration Method, Determination of centroid-integration method (Numerical Problems).

UNIT IV: MOMENT OF INERTIAS OF SURFACE AND VOLUMES

Determination of moment of inertia using area integration method, Determination of moment of inertia using area integration method, Determination of moment of inertia using area integration method, Analytical method, radius of gyration, Polar moment of inertia, Moment of inertia of different sections.

UNIT V: DYNAMICS

Rectilinear motion, Projectile motion, Newtons second law of motion, Alembert's principle, Work, energy, Impulse momentum, Impact/collision of elastic bodies, Oblique impact, Curvilinear motion.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Ferdinand. P. Beer. E, Russell Johnston Jr., David Mazurek, Philip J Cornwell, Vector Mechanics for Engineers: Statics and Dynamics, McGraw - Hill, New Delhi, 10th Edition, 2013.
2. R.K.Bansal, Engineering Mechanics, Laxmi Publications Ltd, 2005.
3. Meriam J.L and Kraige L.G., Engineering Mechanics, Volume I - statics, Volume II - dynamics, John Wiley & Sons, New York, 7th Edition, 2012.
4. Timoshenko, Young, Engineering Mechanics, Tata Mc-Graw Hill Book Company, 5th Edition, New Delhi.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 107	Data Structures	ES	3	0	0	3

UNIT I: INTRODUCTION TO DATA STRUCTURES

Introduction to data structures, Abstract Data Type (ADT) representation and implementation, Time and space requirements of algorithms, Array ADT, representing polynomials, Sparse matrices using arrays and their operations, Implementation of double linked list various operation using C, Stacks and Queues: Representation and application, implementation of stack and queue operations using C.

UNIT II: LINKED LISTS

Single linked lists, Implementation of link list, various operation using C, double linked list, circular list and applications.

UNIT III: TREES

Tree terminology, Binary tree, Binary search tree, Infix to Post fix conversion, Postfix expression evaluation, AVL Tree, Complete Binary Tree representation.

UNIT IV: GRAPHS

Graph terminology, Representation of graphs, Path matrix, BFS (breadth first search), Implementation of BFS using C, DFS (depth first search), Implementation of DFS using C, Topological sorting, Shortest path algorithms, Priority Queues : Heap Structures, binomial heaps, leftist heaps.

UNIT V: SORTING AND SEARCHING TECHNIQUES

Bubble sort, Selection sort, Insertion sort, Quick sort, Merge sort, Heap sort, Radix sort and Implementation, Linear and binary search methods, implementation.

TEXT BOOKS /REFERENCE BOOKS /OTHER READING MATERIAL

1. "Data Structure -- A Pseudo code approach with C" by Richard R. Gilberg & Behrouz A. Forouzan, 2nd edition, 2011. Cengage Learning. Imprint: Thomson Press (India) Ltd.
2. Data Structures Using C" by Aaron M. Tanenbaum, Yedidvah Langsam, and Moshe J. Augenstein. Pearson Publishers, 2019.
3. Data structures and Algorithm Analysis in C, Mark Allen Weiss, Pearson publications, Second Edition Programming in C. P. Dey and M Ghosh, Second Edition, Oxford University Press.
4. Fundamentals of data structure in C" by Horowitz, Sahani & Anderson Freed, Computer Science Press
5. G. A. V. Pai: "Data Structures & Algorithms; Concepts, Techniques & Algorithms" Tata McGraw Hill.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 107 L	Data Structures Lab	C	3	0	0	3

Week 1 & 2:

Simulate the following operations

- a. Conversion of infix expression to postfix expression.
- b. Evaluation of expressions.
- c. Assignment-1: Tower of Hanoi is a mathematical puzzle where we have three rods and n disks. The objective of the puzzle is to move the entire stack to another rod, obeying the following simple rules:
 - i. Only one disk can be moved at a time.
 - ii. Each move consists of taking the upper disk from one of the stacks and placing it on top of another stack i.e. a disk can only be moved if it is the uppermost disk on a stack.
 - iii. No disk may be placed on top of a smaller disk
 - iv. You can choose to use the function move (4, 1, 3, 2), where 4 represents the number of disks. 1 represents disks on source shaft, 3 represents the destination shaft which holds the disks after the move and finally 2 represents the intermediate support shaft – temporary storage. Write a C program to simulate the given problem and: Perform the algorithmic complexity analysis for the solution you propose.

Week 3 & 4:

Simulate the following tasks:

- a. Implementation of the following operations: enqueue, dequeue and finding an element.
 - i. Linear Queue using arrays.
 - ii. Circular queue arrays.
 - iii. Priority queue singly linked list.
- b. Assignment-2: The “4-Queens Problem” consists of placing four queens on a 4 x 4 chessboard so that no two queens can capture each other. That is, no two queens are allowed to be placed on the same row, the same column, or the same diagonal (both primary and secondary diagonals). Write a C program to simulate the given problem and perform the algorithmic complexity analysis for the solution you propose.

Week 5 & 6:

Demonstrate the following through simulation:

- a. Create a singly linked list and perform the following operations:
 - i. Add an element at the end of the list
 - ii. Delete an element from the beginning of the list
 - iii. Find the middle element of the list
 - iv. Search the given key from the list
 - v. Polynomial addition using linked list
 - vi. Sparse matrix operations using linked list
- b. Assignment-3: Let us consider a small but busy airport with only one run-way (shown in figure). In each time unit, one plane can land or one plane can take off, but not both. Planes arrive ready to land or to take off at random times, so at any given unit of time, the runway

may be idle or a plane may be landing or taking off, and there may be several planes waiting either to land or take off. We therefore need two queues, called landing and takeoff, to hold these planes. It is better to keep a plane waiting on the ground than in the air, so a small airport allows a plane to take off only if there are no planes waiting to land. Hence, after receiving requests from new planes to land or take off, our simulation will first service the head of the queue of planes waiting to land, and only if the landing queue is empty will it allow a plane to take off. We shall wish to run the simulation through many units of time, and therefore, we embed the main action of the program in a loop that runs for cur-time (denoting current time) from 1 to a variable end-time. Simulate the given scenario using and write the output for different inputs.

Week 7 & 8:

Write code to perform the following operations:

- a. Develop a code to test whether the given tree is binary tree or not.
- b. Implementation of Binary tree traversals techniques – pre-order, in-order, and post-order.
- c. Implementation of AVL tree and its operations.
- d. Assignment-4: Given a mathematical expression, evaluate it using appropriate tree structure.

Week 9 & 10:

Write the codes to perform the following tasks

A Implementation of Graph traversals techniques: i) BFS and ii) DFS.

b. Assignment-5: The Dijkstra's algorithm is an algorithm that gives the shortest path between two given vertices of a graph. In this problem we are given a directed graph with each edge having a non-negative weight. Thus, a solution requires a path of many other that costs least. We can think of the problem as like this: think graph G as a map of the airline routes, each node of the graph as the cities and the weights on each edge as the cost of flying from one city to another city. The solution we have to find a routing from a city v to city w such that the total cost is minimum.

Write a C program to simulate the given problem. That is find the shortest path between node A and node F in the given graph.

Week 11 & 12:

Implementation of the following algorithms:

- a. Linear search.
- b. Binary search.
- c. Implementation of Bubble sort algorithm.
- d. Implementation of Selection sort algorithm.
- e. Implementations of Merge sort algorithm.

Week 13 & 14:

- a. Implementation of Insertion sort algorithm.
- b. Implementation of quick sort algorithm.
- c. Assignment-6: Suppose you work at college library. You are in the middle of a quiet afternoon when suddenly a shipment of 3928 different books arrives. The books have been dropped of in one long straight line, but they are all out of order, and the automatic sorting system is broken. To make matter worse, classes will start tomorrow, which means that first thing in the morning, students will show up in droves looking for these books. How can you

get them all sorted in time.?

Simulate the given scenario using C code. Perform the algorithmic time complexity analysis for the solution you propose. Also give the space complexity.

Week 15:

Our Text editor will allow us to read a file into memory i.e., it is stored in the buffer. We consider each line of text to be a string and buffer will be a list of these lines. we shall then devise editing commands that will do list operations on lines in buffer and will do string operations on characters in a single line. Here are few commands;

- a. R – Read the text file
- b. W – Write to text file
- c. I – Insert a new line
- d. D – Delete the current line
- e. P – Previous line (back up one line in buffer)
- f. B – Go to first line of buffer
- g. E – Go to last line of buffer
- h. Q – Quit the editor

Tasks we do are:

- a) Receiving a command from user
- b) Get Command () – this function gets the command from user
- c) Do Command () – this function performs the command

Now we have to perform the command for example if the command is ‘b’ we have to go beginning of buffer; if it is ‘n’ we must move to next line. All these commands can be performed using switch case statement. Using the switch case statements, we check for the command and specify the functions to perform the appropriate task.

Reading and Writing Files:

- a. Reads the file contents of input file into buffer stopping at the end of file. Here we use some functions List Empty (), Clear List (), Create List (), Insert List (), see the code in the book for better understanding.
- b. Searching for a String: Here we search for a string from user and informs the user if the target is found or not.
- c. Changing one string to another: Here we change the string that the user wants to replace from the existing string. If the string is not found user will be informed that string is not found. If found, we should replace the old string with the new string.

Perform the algorithmic complexity analysis for the solution you propose.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. <https://www.youtube.com/watch?v=YstLjLCGmgg>
2. Data Structures and Program Design in C by Robert Kruse, C L Tondo, Bruce Leung and Shashi Mogalla. For pseudocode, refer the following pages 98 to 105.
3. Online Reference: https://www.youtube.com/watch?v=xFv_Hl4B83A
4. Data Structures and Program Design in C by Robert Kruse, C L Tondo, Bruce Leung and Shashi Mogalla. For pseudocode, refer the following pages 139 to 150
5. Data Structures and Program Design in C by Robert Kruse, C L Tondo, Bruce Leung and Shashi Mogalla. For pseudocode, refer the following pages 510 to 514
6. Data Structures and Program Design in C by Robert Kruse, C. L. Tondo , Bruce Leung and Shashi Mogalla. For pseudocode, refer the following pages 302 to 312.

7. Online resources: Use the following link to get a better understanding on the problem.
<https://www.youtube.com/watch?v=PgBzjlCcFvc>
8. <https://www.programiz.com/dsa/quick-sort>

NOTE: -

1. The assignments can be performed in groups (not more than 4 in a group).
2. Deliverables: A report containing the following
 - a. Title of the problem/program
 - b. Problem statement and Objective(s) of the problem
 - c. Working code, without errors.
 - d. Output written for different input cases.
 - e. Conclusion: Algorithmic complexity and the problem you faced during the learning to execution stage.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ECO 121	Principle of Economics	HS	3	0	0	3

UNIT I: CONSUMER BEHAVIOR

Definition; Scope and method of economics; the economic problem, Science of economics; the basic competitive model; prices, Science of economics; the basic competitive model; prices, Concept of Demand and supply, Equilibrium of market, The concept of elasticity, The concept of elasticity, Consumer Surplus, Application of consumer surplus, Budget constraints, Utility Analysis: Ordinal and cardinal utility analysis, Utility Analysis: Ordinal and cardinal utility analysis, Applying theory of Labour.

UNIT II: PRODUCER THEORY AND MARKET

Theory of Production, Theory of Production, Theory of Cost: concepts and definition; types, Short run and long run cost curves, Structure of Market, Perfect competition, Monopoly, Monopolistic competition.

UNIT III: MACRO ECONOMIC ISSUES

GDP- definition and concepts, Measurement of National Income: Different methods, Consumption function, Investment, Demand for money, Supply of Money, Inflation, Unemployment.

UNIT IV: INTERNATIONAL TRADE

Balance of payments, International trade, Trade balance, The foreign exchange markets.

UNIT V

Feature of the Indian Economy, Inclusive Growth, relevance for the Indian Economy, Sustainable Development.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Principles of microeconomics, N. Gregory Mankiw, Publisher: Cengage Learning fifth edition.
2. Principles of Economics, Case Karl E, Fair Ray C; Oster Sharon M, Publisher: Pearson tenth edition.
3. Economics, Samuelson P A and Nordhus W D; Publisher: McGraw-Hill Irwin.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
MAT 121	Multi Variable Calculus	BS	3	0	0	3

UNIT I: VECTORS AND THE GEOMETRY OF SPACE

Three-dimensional coordinate system, distance, spheres, Vectors, Dot product, properties, vector projection, Cross Product, triple scalar, or box product, Lines and Planes, Extra examples.

UNIT II: PARTIAL DERIVATIVES

Functions of several variables, Graphical software, Limits and continuity in several variables, Partial derivatives, The Chain Rule, Directional derivative, Directional derivative, Extra exercises, heat equation, wave equation, Laplace equation in two and three dimensions.

UNIT III: EXTREME VALUES

First derivative test for local extreme values, Second derivative test, saddle points, Hessian, Lagrange Multipliers, Further examples.

UNIT IV: INTEGRATION IN TWO DIMENSIONS

Double integrals over rectangles, Double integrals over general regions, Fubini's Theorem, Further examples of double integrals, Area, Integration using Polar Coordinates.

UNIT V: INTEGRATION IN THREE DIMENSIONS

Triple Integrals in rectangular coordinates, Volume, average value.

			L	T	P	C
ME 103 L	Mechanical Engineering Tools	ES	0	0	2	1

LIST OF PRACTICAL EXPERIMENTS

1. Step fitting of two metal plates using fitting tools.
2. Drilling & Tapping for generating hole and internal thread on a metal plate.
3. Simple turning of cylindrical surface on MS rod using lathe machine tool.
4. Plumbing of bathroom/kitchen fitting using various plumbing components and tools.
5. Butt joint of two metal plates using arc welding process.
6. Lap joint of two metal plates overlapping on one another using arc welding process.
7. T-joint of a metal plate at perpendicular direction over another plate using arc welding process.
8. MIG welding of metal plates.
9. Cross halving joint of two wooden pieces at perpendicular direction.
10. Dovetail halving joint of two wooden pieces in the shape of dovetail.
11. To make circular shapes, grooving in wood piece using wood turning lathe.
12. To make duster from wooden piece using carpentry tools.
13. To make rectangular shaped tray using GI sheet.
14. To make geometrical shape like frustum, cone and prisms using GI sheet.
15. To make bigger size scoop using GI sheet. To forge chisel from MS rod using black smithy.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ENG 105	Engineering Graphics	ES	1	0	2	2

UNIT I: PROJECTION OF POINTS, LINES, PLANES, SOLIDS

Projection of points, Projection of lines, Projection of planes, Projection of solids, Use of software tool to create projections.

UNIT II: SECTIONS AND DEVELOPMENTS

Sections of solids, True shape of the section, Development of surfaces of sectioned solids, CAD exercises.

UNIT III: ISOMETRIC VIEWS

Isometric projections of simple and truncated solids, Isometric to orthographic and vice versa, Perspective projection, CAD exercises.

UNIT IV: GEOMETRIC DIMENSIONING AND TOLERANCES

GD and T rules and concepts, Geometric characteristics and modifiers, Fourier transform, bode plot, bandwidth, Datums and datum references, CAD exercises.

UNIT V FREE HAND SKETCHING AND CAD

Free hand sketching of real objects, Free hand sketching of multiple views from pictorial views, CAD exercises, Assignments of 2D and 3D drawings.

TEXT BOOKS

Bhatt, N.D, Engineering Drawing, Charotar Publishers, 2014.

SEMESTER-II

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 204	Engineering Geology	C	2	0	0	2

UNIT I: INTRODUCTION

Definition, introduction and Scope of Geology for Civil Engineers and concerned organizations, Branches of Geology with their importance, definitions, Origin of the earth and different theories, Physical properties of Minerals- megascopic, Chemical Properties of Minerals, use of Instruments like SEM, XRD in mineral identification.

UNIT II: PETROLOGY

De Rock cycle, Specific Gravity of Rocks, determination, Co Concept of Hot Spring and Geysers, Characteristics of different Types of Magma, hoI Igneous Petrology- Different Classifications of Igneous Rocks. Detailed Study of Igneous Rocks- Granite, Gabbro, Basalt, Pegmatite, Rhyolite or Tuff, Felsite, and their Engineering Aspects, Ho Sedimentary Petrology, classification and study of some examples like Sand stone, Limestone, Shale, Conglomerate, Breccia, Mudstone, Co Metamorphic Petrology- Agents and Types of Metamorphism, Metamorphic Grades, Mineralogical Composition, Structures & Textures of Rocks, Schistosity, gneissocity.

UNIT III: PHYSICAL GEOLOGY

The weathering concept, types of weathering, Geological agents, erosion, denudation, waterfall, gorges, River meandering, oxbow lake, Uti Glacial deposits, solifluction deposits, Mud flows, Uti Desert landforms, Coastal deposits.

UNIT IV: STRENGTH BEHAVIOUR OF ROCKS

Concept of Rock Deformation & Tectonics, Stress and Strain in Rocks, Dip and Strike. Inliers and Outliers, Fold- Types and nomenclature, Criteria for their recognition in the field, Faults- Classification, recognition in field, effects on Outcrops, Joints - Types, Stresses responsible, Geotechnical importance, Unconformity- Types, Stresses responsible, Geotechnical importance.ng.

UNIT V: GEOLOGICAL HAZARDS

Rock instability and Slope Movement Concept of Sliding Blocks. Different Controlling Factors. Types of Land Slides. Prevention, Pe Land slides and its causes and Consequences, examples, Factors Controlling Ground Water, Capacity of Rock. Pervious and Impervious Rocks. Lowering of Water Table and Subsidence, Earthquake: Magnitude and Intensity of Earthquake. Seismic Sea Waves. Revelation from Seismic Records of Structure of Earth, Volcanoes. Types of Volcanic Eruption.

UNIT VI: ROCK MASSES AS CONSTRUCTION MATERIAL

Main Features that affects the Quality of Rock Engineering and Design. Effect of alteration and weathering, B Basic Element and Structures of Rock those are relevant In Civil Engineering areas, Rock Quality Designation. Rock Mass Description.

UNIT VII: GEOLOGY OF DAM AND RESERVOIR SITE

Eo Geological Considerations for selecting dams, reservoirs, Gg Different types of Rocks and their

Special Features, Precautions to counteract Unsuitable Conditions, Gg Significance of discontinuities on the dam site and treatment to be given to such Structures.

SEMESTER-III

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 209	Fluid Mechanics	C	3	0	0	3

UNIT I: PROPERTIES OF FLUID AND FLUID STATICS

Properties of Fluid; Fluid Continuum; Newtonian and Non - Newtonian fluids, Vapour pressure, Compressibility and Elasticity; Surface Tension and Capillarity, Fluid Statics: Variation of static pressure; Pascal's Law; Atmospheric, Absolute and gauge pressure, Pressure measurement by manometers; Pressure on plane surfaces and curved surfaces, Buoyant Force and Centre of Buoyancy; Stability of submerged bodies and floating bodies, Metacenter and metacentric height, Numerical Problems.

UNIT II: KINEMATICS AND DYNAMICS OF FLUID FLOW

Kinematics of Fluid Flow: Methods of describing fluid motion; Classification of flows, Laminar and turbulent flows, Three, two and one dimensional flows; Irrotational and rotational flows, Equation for acceleration; Convective acceleration; Local acceleration; Continuity equation, Velocity potential and stream function; Vortex flow – free vortex and forced vortex flow, Dynamics of Fluid Flow: Euler's equation of motion; Bernoulli's equation, Energy correction factor; Momentum principle; Applications of momentum equation.

UNIT III: MEASUREMENT OF FLOW THROUGH PIPES AND ORIFICES

Measurement of flow through Pipes – methods and various devices, Discharge through Venturi meter; Discharge through orifice meter, Numerical problems, Measurement of velocity by Pitot tube. Determination of coefficients for an orifice. Numerical problems, Flow through large rectangular orifice; Flow through submerged orifice, Classification of mouthpieces.

UNIT IV: FLOW THROUGH NOTCHES AND WEIRS

Flow through rectangular channels, Flow through triangular and trapezoidal notches and weirs, Cippoletti Weir; End contractions, Velocity of approach; Broad crested weir.

UNIT V: FLOW THROUGH PIPES, LAMINAR AND TURBULENT FLOWS

Flow through Pipes: Energy losses in pipelines, Numerical problems, Darcy-Weisbach equation; Minor losses in pipelines, Concept of equivalent length, Hydraulic power transmission through a pipe; Pipes in series and parallel, Laminar Flow: Relation between shear and Pressure Gradients in Laminar Flow, Reynold's experiment; Critical velocity; Steady laminar flow through a circular pipe, Laminar Flow between Parallel Plates, Laminar flow in pipes, Turbulent flow in pipes. Numerical problems.

REFERENCE BOOKS/OTHER READING MATERIAL

1. K. Subramanya, Theory and Applications of Fluid Mechanics, Tata McGraw Hill Publishing Company.
2. R. K. Bansal, Fluid Mechanics and Hydraulic Machines, Laxmi Publications.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 203	Strength of Materials	C	3	0	0	3

UNIT I: SIMPLE STRESSES AND STRAINS

Introduction, Basic concepts, Simple stresses and strains; Elasticity and plasticity; Types of stresses and strains; Hooke's law; Stress-strain diagrams, Working stress; Factor of safety; Lateral strain; Volumetric strain and Poisson's ratio; Elastic moduli; Elastic constants for isotropic materials, Statically determinate and indeterminate problems, Bars of varying section—composite bars; Temperature stresses, Strain energy; Resilience – Gradual, sudden, impact and shock loadings.

UNIT II: SHEAR FORCE AND BENDING MOMENT

Introduction to types of beams, supports and loadings; Shear force and bending moment, Cantilever, simply supported and overhanging beams subjected to point loads, UDL, uniformly varying loads and combination of these loads, Point of contra flexure – Relation between S.F., B.M and rate of loading at a section of a beam, Couple and their combinations.

UNIT III: FLEXURAL STRESSES

Theory of simple bending and assumptions, Derivation of bending equation: $M/I = f/y$ E/R , Neutral axis; Determination bending stresses, Section modulus of rectangular and circular sections (Solid and Hollow), I, T, Angle and Channel sections, Design of simple beam sections.

UNIT IV: SHEAR STRESSES

Derivation of formula; Shear stress distribution, rectangular, circular, triangular, I, T angle sections, built up beams, shear center.

UNIT V: TORSION IN CIRCULAR SHAFTS

Introduction; Pure torsion; Assumptions; derivation of torsion equation for circular shafts, torsional rigidity and polar modulus, power transmitted by a shaft, power transmitted by a shaft.

TEXTBOOKS

1. Strength of materials, S. Ramamrutham and R. Narayanan, Dhanpat Rai publishers.
2. A textbook of strength of materials, R. K. Bansal, 5th Ed., Laxmi publications.
3. Strength of materials, B. C. Punmia, Ashok K. Jain and Arun K. Jain, Laxmi publications.

REFERENCE BOOKS

1. Elements of strength of materials, S. P. Timoshenko and D. H. Young, 5th Ed., East-West press.
2. Mechanics of materials, Ferdinand P. Beer, E. Russell Johnston and Jr. John T. DeWolf, 3rd Ed., Tata McGraw-Hill.
3. Mechanics of materials, Russel C. Hibbeler, 9th Ed., Pearson publications.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 203 L	Strength of Materials Lab	C	3	0	0	3

LIST OF PRACTICAL EXPERIMENTS

1. Tensile test on Mild steel rod.
2. Compression test of Concrete cubes and cylinders.
3. Test on open coil and closed coil Helical springs.
4. Izod & Charpy impact test.
5. Torsion test on Graded steels.
6. Deflection test on beams of different materials using Maxwell reciprocal theorem.
7. Double shear test on metallic materials.
8. Rockwell & Brinell hardness test of metallic materials.
9. Bend test of metallic rods.
10. Fatigue testing of materials under notched and unnotched conditions.
11. Comparison of mechanical properties of Unhardened, Quenched and tempered specimen.
12. Strain measurement on rods and beams.
13. Study on photo elasticity.
14. Buckling analysis.
15. Creep Test.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 206	Surveying	C	3	0	0	3

UNIT I: INTRODUCTION TO SURVEYING

Principles, Linear, Angular and graphical methods, Survey Stations, Survey lines - Ranging, bearing of survey lines, Leveling.

Plane table Surveying, Principles of Leveling - booking and reducing levels; differential, reciprocal, profile Leveling and cross-sectioning. digital and Auto level, Errors in Leveling;

Contouring: Characteristics, methods, uses; areas and Volumes.

Triangulation and Trilateration (6 hours): Theodolite Survey: Instruments, Measurement of horizontal and vertical angle horizontal and vertical control- methods - Triangulation - network - Signals. Baseline - Choices - instruments and accessories - extension of baselines - Corrections- Satellite station - reduction to centre - intervisibility of height and distances - Trigonometric Leveling - Axis Single Corrections.

UNIT II: CURVES

Elements of simple and compound curved - Method of setting out - Elements of Reverse Curve - Length of curve - Elements of transition curve - Vertical Curves.

UNIT III: MODERN FIELD SURVEYS

Principle of Electronic Distance Measurement, Modulation, Types of EDM instruments, Distomat, Total Station - Accessories - Advantages and applications, Field Procedure for total station survey.

6. Errors in Total Station Survey; Global Positioning Systems - Segments, GPS measurements, errors and biases, Surveying with PS, Co-Ordinate transformation, accuracy considerations.

UNIT IV: PHOTOGRAMMTRY SURVEYING

Introduction, Basic Concepts, Perspective geometry of aerial photography, relief and tilt displacements, terrestrial photogrammetry, flight planning; Stereoscopy, ground control extension of.

photographic mapping - aerial triangulation, radial triangulation, methods; Photographic mapping - mapping using paperprints, mapping using stereoplottting instruments, mosaics, map substitutes

UNIT V: REMOTE SENSING

Introduction - Electromagnetic spectrum, interaction of electromagnetic radiation with the atmosphere and earth surface, remote sensing data acquisition: Platforms and sensors; Visual image interpretation; digital image processing

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Madhu, N, SAhithi Kumar, R and Sathesh obi, Advanced Surveying: Total Station, IS and Remote Sensin, Pearson India, 2006.
2. B.C.Punmia, Ashok Kumar Jain, Arunkumar, Surveying Vol-I & Vol-II, Laxmi Publications (P) Ltd, 22, Golden House, Darya Ganj, New Delhi-110002

3. Manoj, K, Arora and Badjatia, Geomatics Engineering, Nem Chand & Bros, 2011
4. Bhavikatti, S.S. , Surveying and levelling, Vol. I and II, K. International, 2010.
5. Chandra, A.M., Higher Surveying, Third Edition, New Age International (P) Limited, 2002.
6. Anji Reddy, M., Remote Sensing and Geographical information system, B.S. Publications, 2001.
7. Arora, K.R., Surveying, Vol-I. II and III, Standard Book House, 2015.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 206 L	Surveying Lab - I	C	3	0	0	3

I. CHAIN SURVEYING

1. Introduction to chain surveying.
2. Direct ranging by Chain surveying.
3. Indirect Ranging by Chain surveying.
4. Area Calculation by chain surveying.
5. Widening of the Road by chain surveying.

II. COMPASS SURVEYING

6. Area Calculation by Compass Surveying.
7. Inaccessible points by compass surveying.

III. PLANE TABLE SURVEYING

8. Radiation Method by plane table surveying.
9. Intersection Method by plane table surveying.
10. Traversing by plane table surveying.

IV. DUMPY LEVEL SURVEYING

11. Simple Levelling
12. Differential Levelling
13. Profile levelling
14. Longitudinal and Cross Section of a Road
15. Reciprocal Levelling

V. THEODOLITE SURVEYING

16. Introduction to Theodolite
17. Repetition
18. Reiteration
19. Measurement of vertical Heights

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Pravesh Saini, 2018 Laboratory Manual, Surveying , by, Government Engineering College, Ajmer.
2. B.Suresh,2019, Surveying Laboratory Manual, , Institute of Aeronautical Engineering (Autonomous) Dundigal, Hyderabad - 500 043
3. K.G. Reddy, 2018, Surveying Laboratory Manual, JNTU, Hyderabad.

4. Surveying-1, Laboratory Manual, 2018 by AURORA'S TECHNOLOGICAL AND RESEARCH INSTITUTE Uppal, Parvathapur, JNTUK.
5. B.C.Punmia, Ashok Kumar Jain, Arunkumar, Surveying Vol-I & Vol-II, Laxmi Publications (P) Ltd, 22, Golden House, Darya Ganj, New Delhi-110002.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
MAT 131	Differential Equations	BS	3	0	0	3

UNIT I: FIRST ORDER DIFFERENTIAL EQUATIONS

Classification of ODEs (Linear, Non-linear, Exact, Separable, Geometric meaning of $y' = f(x, y)$, Direction Fields, Numerical methods for solving ODEs, Euler's Method, Integrating Factor, Bernoulli Equations, Initial Value Problem, Existence and Uniqueness, Picard's method, Modelling (Free falling object, Radioactivity, RL-circuit).

UNIT II: SECOND AND HIGHER ORDER LINEAR ODES

Homogeneous Linear ODEs, Modelling of Free Oscillations of a Mass-Spring System, Euler-Cauchy Equations, Non-homogeneous ODEs, Variation of Parameters, Modelling (Forced Oscillations, Electric Circuits).

UNIT III: SYSTEM OF ODES

Modelling Engineering problems (Electric Network, Mixing problem in two tanks etc.) as systems of ODEs, Wronskian, Phase-Plane Method, Critical Points & Stability, Qualitative Methods for Nonlinear Systems, Nonhomogeneous Linear Systems of ODEs.

UNIT IV: SERIES SOLUTIONS OF ODES

Introduction to power series method, Legendre's equation & polynomials, Frobenius Method, Bessel's Equations & Functions.

UNIT V: LAPLACE TRANSFORMS

Laplace transforms of standard functions, Shifting Theorems, Transforms of derivatives and integrals, Unit step function, Dirac's delta function, Inverse Laplace transforms, Convolution theorem (without proof)., Application: Solutions of ordinary differential equations using Laplace transforms.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Willaim Boyce and Richard DiPrima, Elementary Differential Equations and Boundary Value Problems, 11th Edition, Wiley-India.
2. Erwin Kreyszig, Advanced Engineering Mathematics, 10th Edition, Wiley-India.
3. Mary L. Boas, Mathematical Methods in Physical Sciences, 3rd Edition, Wiley-India.
4. G. F. Simmons, Differential Equation with Applications and Historical Notes, TATA McGraw Hill.
5. S. Vaidyanathan, Advanced Applicable Engineering Mathematics, CBS Publishers.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ISES 201	Industry Specific Employability Skills III	HS	1	1	0	1

UNIT I

Percentages, profit and loss, SI and CI, Time and work, Average and progression.

UNIT II

Time – speed and distance, Number system and arrangements.

UNIT III

Ratio and proportions, Mixtures and Alligation, Direction problems, Direction problems, coding and decoding, Number series and Alphabet series.

UNIT IV

Antonyms, synonyms, odd words, Idioms and phrasal verbs, same word with different part of speech.

UNIT V

Word analogy. Sentence completion, Text completion, Sentence equivalence.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Arun Sharma – How to prepare for Quantitative Aptitude, Tata Mcgraw Hill.
2. RsAgarwal, A Modern Approach to Verbal and Non Verbal Reasoning, S.Chand Publications.
3. Verbal Ability and Reading comprehension-Sharma and Upadhyay.
4. Charles Harrington Elstor, Verbal Advantage: Ten Easy Steps to a Powerful Vocabulary, Large Print, September 2000.
5. GRE Word List 3861 – GRE Words for High Verbal Score, 2016 Edition.
6. The Official Guide to the GRE-General Revised Test, 2nd Edition, Mc Graw Hill Publication.

SEMESTER-III

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 230	Industry Standard Coding Practice 1	C	0	0	4	1

UNIT I

Problem Solving with - Basic coding practices, Expression Evaluation, Operators Usage, Expressions, Control Structures, Loop & Iterations for all test case scenarios.

UNIT II

Problem Solving using time efficient logics, linear list data, Array problems, 2D Arrays and Matrix Data for all test case scenarios.

UNIT III

Problem Solving with - Pointers & Memory referencing, String Handling, functions for all test case scenarios.

UNIT IV

Problem Solving with - parameter passing, Recursions, Recursion Analysis, Structures and unions, Enumerations & Memory allocation for all test case scenarios.

UNIT V

Problem solving with - String manipulations. Lists, display patterns, strings, matrix, tuples, dictionaries, modules, packages, exception handling using Python.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Problem solving with C++ -9e- Walter Savitch – Pearson.
2. The complete Reference C, Fourth Edition – Herbert Schildt – MC Graw Hill.
3. Programming in Python 3, A complete introduction to Python language - 2e - Mark Summerfield – Addison-Wiley.

SEMESTER-IV

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 201	Concrete Technology	C	3	0	2	4

UNIT I: OVERVIEW OF CONCRETE AND CONSTRUCTION MATERIALS

Nature and advantages of concrete, Overview of various construction materials, Overview of Cement, Overview of fine and coarse aggregates, Properties of water, Role of chemical and mineral admixtures.

UNIT II: CEMENT

Manufacture and composition of cement, Modified portland cements, Specifications and tests for portland cements, Chemistry of hydration, Properties of hydration products, Microstructure and properties of hydrated cement paste, Blended cements, fly ash and slag, Effect of fly ash and slag on properties of fresh and hardened concrete.

UNIT III: WATER, AGGREGATES AND ADMIXTURE

Water quality, Classifications and properties of aggregates, Non standard aggregates, Use of chemical admixture, Water reducing admixture, Admixture for set control.

UNIT IV: PROPERTIES OF CONCRETE, CURING CONDITIONS AND MIX DESIGN

Workability and properties of fresh concrete, Factors influencing workability, setting of concrete and tests for fresh concrete, finishing of concrete and role of curing temperature, Tests for compressive strength, Quality assessment of concrete and other methodologies, Fundamentals of mix design, Mix design as per BIS Method.

UNIT V: DURABILITY AND SPECIAL CONCRETES

Permeability of concrete, Physical attack, Chemical attack-carbonation, Sulphate attack and chloride attack, High strength concrete, Self-compacting concretes, Lightweight concretes and other concretes.

TEXT BOOKS

1. Shetty, M. S., and Jain, A K., "Concrete Technology: Theory and Practice", 8th Edition, S, chand publications., New Delhi, 2019.
2. Nevelli, A.M., "Properties of Concrete", – 5th Ed, Prentice Hall Publishers, 2012.
3. Gambhir, M.L., "Concrete Technology", Tata Mc Graw Hill Publishers – 2012.

REFERENCE BOOKS/OTHER READING MATERIAL

1. Mindess, Sidney., Young, J.F., Darwin, D., "Concrete", Pearson Education, 2003.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 201 L	Concrete Technology Lab	C	0	0	2	1

I. PROPERTIES OF CEMENT

- 1.Type of cement.
- 2.Setting behavior of cement.
- 3.Specific gravity and fineness of cement.
- 4.Soundness of cement.
- 5.Identification of grade cement.

II. AGGREGATES

6. Classification of aggregates.
- 7.Sieve analysis of fine aggregates.
- 8.Specific gravity, water absorption of fine aggregates.
- 9.Bulking and packing density of fine aggregates.
- 10.Sieve analysis of coarse aggregates.
- 11.Specific gravity, water absorption of coarse aggregates.
- 12.Flakiness and elongation index of aggregates.

III. PROPERTIES OF FRESH CONCRETE

13. Preparation of fresh concrete
- 14.Workability of concrete
- 15.Air content of concrete
- 16.Compaction factor of concrete
- 17.Flow table measurements

IV. PROPERTIES OF HARDENED CONCRETE

18. Preparation of concrete molds.
19. Density of concrete.
20. Strength of the concrete.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Properties of Concrete – AM Nevelli – 5th Ed, Prentice Hall Publishers, 2012.
2. Concrete Technology – M. S. Shetty – S Chand Co., Publishers – 2018.
3. Concrete Technology – M. L. Gambhir – Tata Mc Graw Hill Publishers – 2012.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 210	Structural Analysis	C	3	0	0	3

UNIT I: INTRODUCTION: REVIEW OF BASIC CONCEPTS IN MECHANICS

Introduction, Different types of structures, Loads on the structural system, Static Equilibrium, Constitutive Relations and Compatibility Conditions, Static Indeterminacy of Structures, Symmetry and Antisymmetry, Tutorial.

UNIT II: ANALYSIS OF STATICALLY DETERMINATE STRUCTURES

Internal Force on a System, Review of Axial Force, Bending Moment and Shear Force Diagram, Analysis of Truss: Method of Joints, Analysis of Truss: Method of Sections, Examples, Tutorial.

UNIT III: CABLES

Introduction to Cable systems, The General Cable Theorem, Application of the General Cable Theorem for Distributed Loading, Arches and suspension cables, three hinged arches and suspension cables, Examples, Tutorial.

UNIT IV: DEFLECTION OF STRUCTURES

Moment Area Method, Conjugate Beam Method, Principle of Virtual Work, Strain Energy Method, Bending Deflection Due to Temperature Variation, Maxwell-Betti Law of Reciprocal Deflections, Examples, Tutorials.

UNIT V: INFLUENCE LINES

Introduction: Variable Loadings, Construction of Influence Lines using Equilibrium Methods, Use of Influence Lines, Müller-Breslau Principle, Examples, Tutorial.

TEXT BOOKS

1. R.C. Hibbeler, Structural Analysis, Pearson Education.
2. C.S. Reddy, Basic Structural Analysis, Tata McGraw Hill.
3. C.H. Norris, J.B. Wilbur, S.Utku, Elementary Structural Analysis, Tata McGraw Hill.

REFERENCE BOOKS/OTHER READING MATERIAL

1. L. S. Negi and R. S. Jangjid, Structural Analysis, Tata Mc. Graw.
2. D.S. Prakash Rao, Structural analysis: Unified approach, Universities Press.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 309	Engineering Hydrology	C	3	0	0	3

UNIT I: INTRODUCTION

Introduction: Hydrologic cycle, Water-budget equation, Applications in engineering, Sources of data

Precipitation: Forms of precipitation, characteristics of precipitation in India,

Measurement of precipitation, rain gauge network

Mean precipitation over an area

Depth-Area-Duration relationships

Depth-Duration-Frequency relationships

Probable maximum precipitation and rainfall data in India

UNIT II: ABSTRACTIONS FROM PRECIPITATION

Evaporation process,

Evaporimeters, analytical methods of evaporation estimation,

Reservoir evaporation and methods for its reduction,

Evapotranspiration, measurement of evapotranspiration,

Evapotranspiration equations,

Potential evapotranspiration over India and actual evapotranspiration,

Interception, depression storage,

Infiltration, infiltration capacity, measurement of infiltration,

UNIT III: RUNOFF

Runoff volume, SCS-CN method of estimating runoff volume,

Flow duration curve, flow-mass curve, Hydrograph, factors affecting runoff hydrograph,

Components of hydrograph,

Base flow separation,

Effective rainfall,

Unit hydrograph – applications and limitations

Unit hydrograph from direct runoff hydrograph

S-Hydrograph

Surface water resources of India, environmental flows.

UNIT IV: GROUND WATER AND WELL HYDRAULICS

---Ground water hydrology---

Occurrence, movement and distribution of ground water

Aquifers – Types, specific yield, permeability, Darcy's law

---Well hydraulics---

Steady state flow in wells,

Equilibrium equations for confined and unconfined aquifers, aquifer tests,

Well constants

UNIT V: WATER REQUIREMENTS

Crop water requirements:

Water withdrawals and uses –water for energy production,

Water for agriculture,

Water for hydroelectric generation; flood control.

Analysis of surface water supply, Water requirement of Crops-Crops and crop seasons in India,

Cropping pattern, duty and delta;

Quality of irrigation water; Soil-water relationships, root zone soil water,

Infiltration, consumptive use, irrigation requirement, frequency of irrigation;

Methods of applying water to the fields: surface, sub-surface, sprinkler and trickle / drip irrigation

UNIT VI: DESIGN OF CANALS

Distribution systems -canal systems, alignment of canals, canal losses,

Estimation of design discharge.

Design of channels-rigid boundary channels, alluvial channels, Kennedy's and Lacey's theory of regime channels.

Lining of canals, types of lining

TEXTBOOKS

1. K. Subramanya, Hydrology (Tata Mc Graw Hill Education).
2. S. K. Garg, Irrigation engineering and hydraulic structures (Khanna publishers).
3. V.P. Singh, Elements of Engineering Hydrology (Tata Mc Graw Hill Education).
4. Jaya Rami Reddy,
5. K.N. Duggal and J.P. Soni, Elements of Water Resources Engineering (New age international)
6. K. Subramanya, Flow in open channels (Tata McGraw-Hill Education)

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 211 L	Surveying Lab - II	C	3	0	0	3

LIST OF PRACTICAL EXPERIMENTS

Theodolite

1. Introduction to Advanced Surveying Laboratory- Electronic Theodolite & Total Station.
2. Study of Theodolite in detail-practice for measurement of horizontal and vertical angles .
3. Measurement of horizontal angles by repetition method.
4. Measurement of horizontal angles by Reiteration method.
5. Trigonometric leveling-heights and distance problem.
6. Heights and distance using principles of Tachometric surveying.
7. Measurement of Vertical heights.
8. Setting out works for buildings & pipe lines.

Total Station

11. Determine of area using Total Station
12. Traversing by Total Station
13. Contouring using Total Station
14. Determination of Remote height using total station
15. Stake out using total station
16. Measurement of Distance, gradient, difference in height between two inaccessible points using total station
17. Curve Setting and different methods
18. Setting out works for buildings & pipe lines
19. Position Fixing Using Global Positioning System (GPS) in the field

Resistivity meter

20. Measurement of Resistance of Sub-surface formations by Wenner's method.
21. Measurement of Resistance of Sub-surface formations by Schlumberger method.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
MAT 221	Probability & Statistics for Engineers	BS	3	0	0	3

UNIT I

Basic principle of counting, permutations, combinations, Multinomial coefficients, sample space and events, Axioms of probability, sample spaces having equally likely outcomes, Conditional probability, Bayes` theorem, independent events.

UNIT II

Random variable, discrete random variable, expected value, expectation of a function of a random variable, variance, discrete probability distributions- Bernoulli, Binomial, Poisson, Geometric, negative, Binomial distributions, expected value of sums of random variables, cumulative distribution function and its properties.

UNIT III

Continuous random variables, Expectation and variance – their properties, Continuous probability distributions – uniform, normal, exponential distributions, Distribution functions.

UNIT IV

Joint distribution functions, Independent random variables and their sums, conditional distributions, Joint probability distribution of functions of random variables, covariance, correlation

UNIT V

Definition of statistics, population and sample, Representative sample, Descriptive statistics – classification and tabulation of univariate data, Graphical representation, frequency curves

TEXTBOOKS

1. Sheldon Ross, A First course in probability (Ninth edition).

REFERENCE BOOKS

1. Michael Baron, Probability and Statistics for computer scientists.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 209 L	Fluid Mechanics and Hydraulic Machinery Lab	C	0	0	2	1

LIST OF PRACTICAL EXPERIMENTS

1. Determination of fluid properties
 - a) Density
 - b) Viscosity
2. Pressure measurements
 - a.) U-tube manometer
3. Verification of Bernoulli's theorem
4. Find the coefficient of discharge of
 - a) Rectangular notch
 - b) Triangular notch
5. Find the coefficient of discharge of
 - a) Venturimeter
 - b) Orificemeter
6. Determination of hydraulic co-efficient of orifices
7. Co-efficient of discharge for a given mouthpiece
8. Stability of floating body and determination of Metacentric height.
9. Determine the friction losses: straight pipes, bends, sudden expansion and contraction, smooth vs rough pipe.
10. Determination on Reynold's number.
11. Determination of velocity using a pitot tube.

TEXTBOOKS

1. S K Som, G Biswas, Suman Chakraborty, Introduction to Fluid Mechanics and Fluid machines, Tata McGraw Hill Education.
2. R. W. Fox, P. J.Pritchard, A. T Mcdonald, Introduction to Fluid Mechanics, John Wiley
3. F. M White, Fluid Mechanics, Tata McGraw Hill Education.

REFERENCE BOOKS/OTHER READING MATERIAL

4. K. Subramanya, Theory and Applications of Fluid Mechanics, Tata McGraw Hill Publishing Company.
5. R. K. Bansal, Fluid Mechanics and Hydraulic Machines, Laxmi Publications.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 205	Geotechnical Engineering I	C	3	0	0	3

UNIT I: INTRODUCTION AND CLASSIFICATION

Introduction to soil formation; soil structure and clay mineralogy; Adsorbed water; Basic Definitions and Relationships-Soil as three-phase system, Mass-volume relationships; Relative density; Determination of Moisture content; Specific gravity; Unit weight; Physical characterization of soil, Grain size analysis-dry & wet conditions; Consistency limits, Various Types of soil Classifications – Unified soil classification and I.S. Soil classification.

UNIT II: SEEPAGE AND PERMEABILITY

Introduction, one dimensioned flow of water through soils Darcy's law and its validity, Laboratory permeability tests, Factors affecting permeability, Permeability of stratified soil masses, Seepage through soils, Quick condition, Flow nets.

UNIT III: STRESSES IN SOILS

Stresses in soils; Stresses induced by applied loads, Boussinesq's and Westergaard's theories for point loads and area loads, Newmark's influence chart; 2:1 stress distribution method, Contact pressure under rigid and flexible area, Computation of displacements from elastic theory.

UNIT IV: COMPACTION AND CONSOLIDATION

Mechanism of compaction; factors affecting, Laboratory and field compaction methods, Compressibility of soils; Stress history, Concept of consolidation by spring analogy, Terzaghi's theory of one-dimensional Consolidation; Time rate of consolidation and degree of consolidation, Determination of coefficient of consolidation, Over consolidated and normally consolidated clays.

UNIT V: SHEAR STRENGTH OF SOILS

Shear strength of soils; Principal planes; Mohr – Coulomb Failure theories, Stress strain behavior of sands and clays; Critical void ratio, Shear strength determination – UCS, Shear box test, Triaxial – UU, CU, CD, Vane shear test.

TEXTBOOKS

1. Principles of Geotechnical Engineering, Braja M. Das, Cengage Learning.
2. Basic and Applied Soil Mechanics, Gopal Ranjan and A. S. R. Rao, New Age International Publishers.

REFERENCE BOOKS

1. An Introduction to Geotechnical Engineering, Holtz R.D. and Kovacs, W.D., Prentice Hall, NJ.
2. Soil Mechanics, Craig R.F., Chapman & Hall.
3. Fundamentals of Soil Engineering, Taylor, John Wiley & Sons.
4. Soil Mechanics in Engineering Practice, Karl Terzaghi, Ralph B. Peck, and Gholamreza.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ISES 202	Industry Specific Employability Skills IV	C	1	1	0	1

UNIT I

Permutation and Combination, Probability, Geometry, and Algebra.

UNIT II

Clocks, Calendars and Blood Relations, Arrangements, Cubes and Syllogism.

UNIT III: CRITICAL REASONING

Introduction to Different Parts of an Argument in Reasoning, Assumption of an Argument, strengthening of an Argument, Weakening of an argument, **Para** jumbles.

UNIT IV VERBAL REASONING

Word Analogy, Sentence Completion & Text Completion, Sentence Equivalence.

UNIT V

Reading Comprehension, Identification of errors, Sentence correction.

TEXT BOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Arun Sharma – How to prepare for Quantitative Aptitude, Tata Mcgraw Hill.
2. RsAgarwal, A Modern Approach to Verbal and Non Verbal Reasoning, S.Chand Publications.
3. Verbal Ability and Reading comprehension-Sharma and Upadhyay.
4. Manhattan GMAT Sentence Correction Guide, 5th Edition.
5. R.S.Aggarwal, A Modern Approach to Verbal & Non-Verbal Reasoning. S.Chand Publications.
6. The Official Guide to the GRE-General Revised Test, 2nd Edition, Mc Graw Hill Publication.

SEMESTER-IV

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 330	Industry Standard Coding Practice -2	ES	0	0	4	1

UNIT I

Problems Solving with: Structure Pointers, formation of links, Operations on Linked lists, Operations on a circular linked list, Operations on a double linked list & Industry Standard Practice Questions.

UNIT II

Problem Solving with - Stack Operations, Queue data structure Implementation, Linear / Binary Search Algorithms, Sorting Algorithms, Industry Standard Practice Questions.

UNIT III

Problem Solving with - Nonlinear data structures, trees operations, application of search property on a binary tree, tree balancing.

UNIT IV

Problem Solving with - Multiway search structures, Operations on a 2-4 tree, nonlinear structures, red, black trees & operations, Tries, String Algorithms & Industry Standard Practice Questions.

UNIT V

Problem Solving with – features of Object-oriented programming, leveraging Standard Template Libraries. Industry Standards of leveraging DBMS concepts, SQL Queries, Entity Relationship Models, Query Optimization, Transactions & Concurrency, Normalization & Industry Standard Practice Questions.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Fundamentals of Data Structures in C++ - 2e- Sahni Horowitz - Universities Press.
2. Algorithms -4e- Robert Sedgewick & Kevin Wayne - Addison-Wesley Professional.
3. C++ Standard Library A Tutorial and Reference – 2e - Nicolai M. Josuttis - Addison Wesley Longman.
4. An Introduction to Database Systems – 8e - C.J. Date – Pearson.
5. Competitive Programming – 3e – Steven Halim, Felix Halim.

SEMESTER-V

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 202	Reinforced Concrete Design	C	3	0	0	3

UNIT I: INTRODUCTION OF RCC MATERIALS

Review of Concrete making materials, Structural concrete Grades, Properties of Concrete, Modulus of elasticity-flexural strength, Characteristic and Design values, Partial safety factor.

UNIT II: DESIGN OF BEAMS

RCC- Limit State method- Assumptions, Stress-Strain behavior of Steel and Concrete, Working stress method- comparison of design process, Analysis and Design of Singly Reinforced Beams, Analysis of Singly Reinforced RC Section- Neutral axis-Balanced-Under Reinforced-Over Reinforced Sections- Moment of Resistance- Design parameters, Design examples, Analysis and Design of Doubly Reinforced Beams, Necessity of Doubly Reinforced sections, Analysis of Doubly Reinforced RC Section-Moment of Resistance, Design parameters and design Examples.

UNIT III: DESIGN OF SLABS

Design of One-way slab, Design of Two-way slabs, Effect of edge conditions- Moment of Resistance- Torsion reinforcement at corners, Design examples, Design of Continuous Slab/Beam, Effect of continuity- analysis of continuous beam/slab, Moment and shear coefficients for continuous beam/slab- Critical sections.

UNIT IV: DESIGN OF COLUMNS

Design principles of RC columns, Assumptions- Rectangular and Circular columns- Helical reinforcement, Minimum Eccentricity-Use of Interaction diagrams for Axial load and Moment.

UNIT V: DESIGN OF FOOTINGS

RC footings, Minimum depth of footing, Safe bearing capacity, Design for Bending-Shear in One way, Shear in Two way- Transfer of load at base of column.

TEXTBOOKS

1. IS-456-2000, IS 3370(Part-IV), BIS 2000.
2. Reinforced Concrete Design- S Unnikrishna Pillai and Devdas Menon
3. Design of Reinforced Concrete Structures (Limit State) – A.K.Jain, 1st Edition, Nemchand Brothers, Roorkee.
4. RCC Designs-B.C.Pumma, A.K.Jain and A.K.Jain, 10th edition Lakshmi Publications Ltd, New Delhi.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 302	Geotechnical Engineering - II	C	3	0	0	3

UNIT I: SLOPE STABILITY

Infinite and finite earth slopes in sand and clay, Types of failures – factor of safety of infinite slopes, stability analysis by Swedish arc method, standard method of slices, Taylor's Stability Number-Stability of slopes of dams and embankments – different conditions.

UNIT II: LATERAL EARTH PRESSURES & RETAINING WALLS

Rankine's & Coulomb's theory of earth pressure, Culmann's graphical method – earth pressures in layered soils, Types of retaining walls, Design approach for gravity retaining wall, cantilever retaining wall, bulk heads, anchored bulk heads.

UNIT III: SHALLOW FOUNDATIONS

Types of foundations and factors to be considered in their location, Bearing capacity – criteria for determination of bearing capacity, Factors influencing bearing capacity – analytical methods to determine bearing capacity, Terzaghi's theory - IS Methods, Safe bearing pressure based on N- value – allowable bearing pressure; Safe bearing capacity and settlement from plate load test.

UNIT IV: DEEP FOUNDATIONS

Types of piles – Load carrying capacity of piles based on static pile formulae, Dynamic pile formulae– Pile load tests - Load carrying capacity of pile groups in sands and clays, Types – Different shapes of well, Types of caissons – Components of well - functions – forces acting on well foundations, Design Criteria – Determination of steining thickness and plug - construction and Sinking of wells – Tilt and shift.

UNIT V: SOIL EXPLORATION

Need – Methods of soil exploration, Boring and Sampling methods, Field tests – Penetration Tests – Pressure meter, Planning of programme and preparation of soil investigation report.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 302 L	Geotechnical Engineering Lab	C	0	0	2	1

LIST OF PRACTICAL EXPERIEMENTS

1. Consistency Limits

Liquid limit, Plastic limit, Shrinkage limit.

2. Soil Gradation

Sieve analysis, Hydrometer analysis

3. Specific Gravity

Density bottle method, Pycnometer method

4. Unit Weight

Determination of Unit Weight by Core cutter Method, Determination of Unit Weight by Sand Replacement Method, Relative Density by Vibration Table Test.

5. Compaction

Standard Proctor Compaction, Modified Proctor Compaction

6. Hydraulic Conductivity

Constant Head Permeability Test, Falling Head Permeability Test

7. Consolidation

8. Strength Tests

Unconfined Compressive Strength (UCS), Unconsolidated Undrained Triaxial Test, (UU), Laboratory Vane Shear Test, Direct Shear Test, California Bearing Ratio Test (CBR)

REFERENCE BOOKS

1. Experimental Soil Mechanics, Jean P. Bardet, Prentice Hall Publishers.
2. Soil Mechanics Laboratory Manual, Braja M. Das, 6th Ed., Oxford University Press.
3. Soil Mechanics Lab Manual, Michael E. Kalinski, 2nd Ed., Wiley Publishers.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 306	Water Resources Engineering	C	3	0	0	3

UNIT I: INTRODUCTION

Introduction: Hydrologic cycle, Water-budget equation, Applications in engineering, Sources of data, Precipitation: Forms of precipitation, characteristics of precipitation in India, Measurement of precipitation, rain gauge network, Mean precipitation over an area Depth-Area-Duration relationships, Depth-Duration-Frequency relationships, Probable maximum precipitation and rainfall data in India.

UNIT II: ABSTRACTIONS FROM PRECIPITATION

Evaporation process, Evaporimeters, analytical methods of evaporation estimation, Reservoir evaporation and methods for its reduction, Evapotranspiration, measurement of evapotranspiration, Evapotranspiration equations, Potential evapotranspiration over India and actual evapotranspiration, Interception, depression storage, Infiltration, infiltration capacity, measurement of infiltration.

UNIT III: RUNOFF

Runoff volume, SCS-CN method of estimating runoff volume, Flow duration curve, flow-mass curve, Hydrograph, factors affecting runoff hydrograph, Components of hydrograph, Base flow separation, Effective rainfall, Unit hydrograph – applications and limitations Unit hydrograph from direct runoff hydrograph, S-Hydrograph, Surface water resources of India, environmental flows.

UNIT IV: GROUND WATER AND WELL HYDRAULICS

---Ground water hydrology---

Occurrence, movement and distribution of ground water, Aquifers – Types, specific yield, permeability, Darcy's law, ---Well hydraulics---, Steady state flow in wells, Equilibrium equations for confined and unconfined aquifers, aquifer tests, Well constants

UNIT V: WATER REQUIREMENTS

Crop water requirements: Water withdrawals and uses –water for energy production, Water for agriculture, Water for hydroelectric generation; flood control. Analysis of surface water supply, Water requirement of Crops-Crops and crop seasons in India, cropping pattern, duty and delta; Quality of irrigation water; Soil-water relationships, root zone soil water, Infiltration, consumptive use, irrigation requirement, frequency of irrigation; Methods of applying water to the fields: surface, sub-surface, sprinkler and trickle / drip irrigation.

UNIT VI: DESIGN OF CANALS

Distribution systems -canal systems, alignment of canals, canal losses, Estimation of design discharge.

Design of channels-rigid boundary channels, alluvial channels, Kennedy's and Lacey's theory of

regime channels.

Lining of canals, types of lining

TEXTBOOKS

1. K. Subramanya, Hydrology (Tata Mc Graw Hill Education).
2. S. K. Garg, Irrigation engineering and hydraulic structures (Khanna publishers).
3. V.P. Singh, Elements of Engineering Hydrology (Tata Mc Graw Hill Education).
4. Jaya Rami Reddy, Engineering Hydrology.

REFERENCE BOOKS/OTHER READING MATERIAL

5. K.N. Duggal and J.P. Soni, Elements of Water Resources Engineering (New age international)
6. K. Subramanya, Flow in open channels (Tata McGraw-Hill Education)

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 207	Transportation Engineering - I	C	3	0	0	3

UNIT I: HIGHWAY NETWORK PLANNING AND ALIGNMENT

Transportation and Society, Transportation Modes, Road Classification and Patterns, Road Development plans, Highway Alignment Requirements, factors controlling alignment, Engineering Surveys, Detailed Project Report.

UNIT II: HIGHWAY GEOMETRIC DESIGN

Highway Cross Section Elements, Sight Distance characteristics of highways, Numerical Problems, Design of Horizontal Alignment- Super elevation and transition curves, Numerical Problems, Extra widening, Numerical Problems, Extra widening, Numerical Problems, Design of Vertical Alignment- Grades and Grade Compensation, Numerical Problems, Types of vertical curves and design. Numerical Problems.

UNIT III: TRAFFIC FLOW CHARACTERISTICS AND DESIGN OF INTERSECTIONS

Road User and Vehicle Characteristics, Traffic Studies: Volume, speed, Traffic Studies: Travel time and delay, parking study, Traffic Stream Characteristics, PCU and Peak Hour Factor, Traffic Stream Characteristics, PCU and Peak Hour Factor, Capacity and Level of Service of Highways, Design of Traffic Control Devices, Signal Design by Webster's Method, Design of Roundabouts- IRC and HCM methods.

UNIT IV: PAVEMENT MATERIALS, TESTING AND DESIGN OF PAVEMENTS

Highway materials - desirable properties and quality control tests, Marshal Method of Bituminous Mix Design, Types of Pavement Structures, Factors Controlling Design of Pavements, Stresses in Pavements, Design of Flexible Pavements- IRC and AASHTO Method of Design, Design of Rigid Pavements- IRC and AASHTO Method of Design.

UNIT V: HIGHWAY CONSTRUCTION AND MAINTENANCE

Construction Procedure for various layers of flexible pavements, Construction Procedure for various layers of rigid pavements, Distresses in flexible and Rigid Pavements, Maintenance of bituminous and concrete pavements.

TEXTBOOKS

1. Fred L. Mannering, Scott S.Washburn and Walter P.Kilareski, Principles of Highway Engineering and Traffic Analysis, Wiley India.
2. Partha Chakraborty and Animesh Das, Principles of Transportation Engineering, Prentic Hall India.
3. S. K. Khanna., C. E. G. Justo and A. Veeraragavan, Highway Engineering- Nem Chand Bros, India.

REFERENCE BOOKS/OTHER READING MATERIAL

1. Ministry of Road Transport and Highways- Specifications for Roads and Bridge Works, Fifth Revision, IRC, New Delhi, India-2013.
2. IRC 37:2012- Guidelines for the Design of Flexible Pavements.
3. IRC 58:2015- Guidelines for the Design of Plain Jointed Rigid Pavements for Highways.
4. Highway Capacity Manual (2010), Transportation Research Board, USA
5. Indian Highway Capacity Manual (2017), Central Road research institute, New Delhi.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 308	Environmental Engineering	C	3	0	0	3

UNIT I: WATER

Introduction: Water supply and demand, Population forecasts, Design period, Types of water demand, Factors affecting, fluctuations, fire demand, Water quality and testing, Drinking water standards, sources of water.

UNIT II: WATER TREATMENT

General outline of water treatment units, Screens – design, Sedimentation – principles, design factors, Coagulation-flocculation clarifier design, Coagulants, feeding arrangements.

Filtration – theory – working of slow and rapid gravity filters, Design of filters, Operational troubles, Disinfection – theory of chlorination, Chlorine demand and other disinfection, practices, Water softening methods, Design of distribution systems, pipe appurtenances.

Analysis of pipe networks.

UNIT III: SANITARY ENGINEERING

Characteristics of sewage, wastewater collection, Estimation of wastewater and storm water, Design of sewers – shapes and materials, Sewer appurtenances, manholes – inverted siphon – catch basins – flushing tanks.

UNIT IV: OTHER POLLUTIONS AND THEIR IMPORTANCE

Module 1--

Air pollution – Composition and properties of air, quantification of air pollutants, Classification of air pollution– Effects of air pollution,

Global effects–Meteorological parameters affecting air pollution, Air quality standards

Atmospheric stability–Plume behavior

--Module 2—

Noise pollution – Basic concept, Measurement and various control methods.

TEXTBOOKS

1. S.K. Garg, Water Supply Engineering: Environmental Engineering (Volume 1).
2. S.K. Garg, Environmental Engineering : Sewage Disposal and Air Pollution Engineering (Volume - 2).
3. Howard S. Peavy, Donald R. Rowe and George Tchobanoglous , Environmental Engineering.
4. B.C. Punmia and Ashok Kumar Jain, Wastewater Engineering (Including Air Pollution).

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 207 L	Transportation Engineering Lab	C	0	0	2	1

LIST OF PRACTICAL EXPERIMENTS

TESTS ON AGGREGATES

Aggregate crushing value test, Aggregate impact value test, Los Angeles's abrasion test, Shape tests, Gradation of aggregate, Specific gravity test.

TESTS ON BITUMEN

Penetration test, Softening point test, Flash and fire point test, Ductility test, Viscosity test.

TRAFFIC STUDIES

Traffic Volume Counts, Traffic Turning Movement Counts, Traffic Spot Speed Study.

TESTS ON BITUMINOUS MIXES

Bituminous Mix Design, Proportioning of Aggregates, Proportioning of Aggregates, Bulk Density and Stability Flow tests, Binder Content Determination.

PAVEMENT DESIGN

Pavement Design, Soil CBR Test, Pavement Design (IRC 37 -2012)

TEXTBOOKS

1. Highway Materials And Pavement Testing by S. K. Khanna, C. E. G. Justo, A. Veeraragavan; Nem Chand & Bros

REFERENCE BOOKS/OTHER READING MATERIAL

2. Bituminous Road Construction in India by Prithvi Singh Kandhal; PHI Learning; Revised edition (30 July 2016)
3. S. K. Khanna., C. E. G. Justo and A. Veeraragavan, Highway Engineering- Nem Chand Bros, India.
4. IRC 37:2012- Guidelines for the Design of Flexible Pavements.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ISES 301	Industry Specific Employability Skills V	HS	1	1	0	0

UNIT I: NUMBERS

Types and Properties of Numbers and Remainders, LCM, GCD, Fractions and decimals, Surds and Progressions.

UNIT II

Permutations, Combinations and Probability, Data Interpretation.

UNIT III

Geometry and Coordinate Geometry, Trigonometry and Mensuration.

UNIT IV: REASONING

Syllogism and Non-Verbal Reasoning, Analytical Reasoning.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Arun Sharma – How to prepare for Quantitative Aptitude, Tata Mcgraw Hill.
2. R.S Agarwal, A Modern Approach to Verbal and Non Verbal Reasoning, S.Chand Publications.
3. Arun Sharma– How to Prepare for Data Interpretation & Logical Reasoning for the CAT.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CSE 331	Industry Standard Coding Practice -3	ES	0	0	4	1

UNIT I

Problem solving with - Descriptive statistics, Mean/median/mode, Measures of dispersion/range variance, deviations, mean/median/mode problems, Random variables, Univariate & Bivariate random variables.

UNIT II

Problem solving with - Graphs, Handshaking Lemma, Simple Graphs, DFS/BFS, Connected components, coloring, Introduction to DAGs, Spanning Trees, Articulation Points/ Connected points.

UNIT III

Problem solving with - Greedy Methods: Coin change, Fractional Knapsack, Activity Selections/ Job sequencing with Deadlines, Spanning Trees, Dynamic Programming: 0/1 Knapsack, Substructures, Longest common substring/subsequence, Longest Increasing sub sequence, Grid based Problems.

UNIT IV

Problem solving with - Divide & Conquer Strategies: Quick/Merge Sort, Min/Power functions, Backtracking, N Queens problem, Finding the path & Grid based problems, iterative/loop free approaches.

UNIT V

R Language Constructs, calculations, Operators, vectors, lists, Practice problems implementing R language, Matrices and data frame, Conditional statements and loops, Problem Solving on R language examples

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. An Introduction to Statistical Learning: with Applications in R - Gareth James, Daniela Witten, Trevor Hastie, Robert Tibshirani.
2. Introduction to Algorithms by Thomas H. Corman, The MIT Press, 3rd Edition.
3. Introduction to Algorithms: A Creative Approach by Udi Mander, Pearson
4. R Cookbook - Paul Teetor, O'reilly.
5. Competitive Programming – 3e – Steven Halim, Felix Halim.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 310	Estimation and Costing	C	3	0	0	3

UNIT I: ESTIMATION PROCEDURES

Procedure of estimating, Main items of work, Deduction for openings, Degree of accuracy, Arch Masonry Calculation.

UNIT II: BUILDING ESTIMATION

Individual wall method, Centre line method, Estimate of RCC slab, Estimate of RCC beam, RCC column with foundation, Estimate of earthwork – Buildings, Estimate of earthwork – Roads and Canals.

UNIT III: SPECIFICATIONS AND ANALYSIS OF RATES

Purpose and method of writing specifications, Detailed specifications (DS) for Brick work, DS for R.C.C. Plastering and Mosaic Flooring, DS for R.R Stone and Masonry, Preparing Analysis of rates for Concrete, Preparing Analysis of rates for RCC Works, Preparing Analysis of rates for Brick work in foundation and super structure, Preparing Analysis of rates for Plastering preparing lead statements.

UNIT IV: PWD ACCOUNTS AND PROCEDURE OF WORKS

Organization of Engineering department; Work charged establishment, Contract; Tender; Tender notice; Tender Schedule, Earnest money; Security money, Measurement book; Administrative approval; Technical sanction; Plinth area; Floor Area; Carpet area, Approximate Estimate; Plinth area estimate, Revised Estimate; Supplementary estimate, Annual budgets of work, cash flow allocations yearly.

UNIT V: VALUATION AND CONTRACTS

TF Accounts of Materials USR Cost; Price & value, Methods of valuation; Out goings; Depreciation, Methods of valuation; Out goings; Depreciation, Methods of valuation; Out goings; Depreciation, Contract: types of contracts, Contract Law, EMD, Tenders, Acceptance of Contract, Branch of Contract.

TEXTBOOKS

1. Estimating and Costing in Civil Engineering (Theory & Practice) by B.N. Dutta; 28th Revised Edition or Latest; UBS Publishers' Distributors Ltd.
2. Estimating, Costing, Specification & Valuation in Civil Engineering by M. Chakraborti, 29th Revised Edition or Latest; S Chand Publishing House.

REFERENCE BOOKS/OTHER READING MATERIAL

1. Estimating, Costing, and Valuation [Professional Practice and Quantity Surveying] by Rangawala; 17th Edition or Latest; Charotar Publishing House Pvt. Ltd.
2. A Text Book of Estimating and Costing for Civil Engineering by G.S. Birdie; 6th Edition or Latest; Dhanpat Rai Publishing Company Pvt. Ltd., New Delhi
3. A Textbook of Estimating, Costing & Accounts (Civil) by R.C. Kohli; 13th Revised Edition or Latest; S. Chand & Company Pvt. Ltd. New Delhi.

SEMESTER-V

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 401	Design of Steel Structures	C	3	0	0	3

UNIT I: INTRODUCTION AND METHODS OF STRUCTURAL DESIGN

Mechanical behaviour of steel – Measures of Yielding – Measures of Ductility, Types of Structures – Structural Steel Sections, Design Philosophies-Working Stress method- Ultimate Strength Method- Load and Resistant factor- Limit State Method-Partial safety factor-Load-Load Combinations- Classification of Cross sections- General aspects in the design.

UNIT II: DESIGN OF STEEL FASTENERS AND TENSION MEMBERS

Types of fasteners – Riveted connections- Bolted Connections-Assumptions- Failure of bolted joints - Strength of bolted joints – Design examples, Design of Welded connections – Butt weld- fillet weld – Design examples, Design of Tension Members: General-Modes of Failure of Tension member- Analysis of Tension members- Example - Design steps – Design examples – Lug angles – Design.

UNIT III: DESIGN OF COMPRESSION MEMBERS

General – Strength of Compression members- Design Compressive strength- Example on analysis of Compression members, Design of Angle struts – Design Examples- Built up Columns- Design of Lacing – Design of Battens- Design Examples- Design of Roof members.

UNIT IV: DESIGN OF BEAM AND COLUMN SPLICES

Design of Beams: General- Lateral Stability of Beams- Bending Strength of Beams –Plastic Section Modulus - Design Examples, Design of Beam Columns: Behaviour of members under combined loading – Modes of Failures – Design Examples, Design of Column Splices and Column Base: Design of Column Splice-Design Examples- Design of Column Base- Slab Base- Gusseted Base- Design Examples.

UNIT V: DESIGN OF ECCENTRIC CONNECTIONS AND PLATE GIRDER

Design of Eccentric Connections: Design of Brackets- Type-1 and Type 2 – Moment Resistant connections - Design Examples, Design of Plate Girder: General- Components of Plate Girder- Optimum depth – Bending Strength – Shear Strength – Shear Buckling- Simple Post critical method- Tension Field method- Stiffeners-Bearing- Transverse stiffeners - Design Examples.

TEXTBOOKS

1. Limit State Design of Steel Structures – S.K.Duggal, TMH Education Pvt Ltd, 2nd Edition,2014.
2. IS-800-2007, BIS Publication.
3. Design of Steel structures – S.S. Bhavikatti, IK International Pub Pvt Ltd, 4th Edition.

REFERENCE BOOKS/OTHER READING MATERIAL

4. Mindess, Sidney., Young, J.F., Darwin, D., “Concrete”, Pearson Education, 2003.

LIST OF PRACTICAL EXPERIMENTS

1. Determination of pH
2. Determination of acidity and alkalinity
3. Total solids in a water sample
4. Conductivity of a water sample
5. Determination of hardness of water
6. Determination of turbidity
7. Chlorine demand of water
8. Dissolved oxygen
9. Biological oxygen demand
10. Optimum dosage of alum using jar test
11. Chemical oxygen demand
12. Total coliforms (using multiple tube fermentation technique)
13. Air quality monitoring

TEXTBOOKS

1. S.K. Garg, Water Supply Engineering: Environmental Engineering (Volume 1).
2. S.K. Garg, Environmental Engineering : Sewage Disposal and Air Pollution Engineering (Volume - 2).
3. Howard S. Peavy, Donald R. Rowe and George Tchobanoglous , Environmental Engineering.
4. B.C. Punmia and Ashok Kumar Jain, Wastewater Engineering (Including Air Pollution).

REFERENCE BOOKS/OTHER READING MATERIAL:

1. MetCalf & Eddy, Wastewater Engineering Treatment and Reuse.

SEMESTER-VI

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 303	Construction Engineering and Management	C	3	0	0	3

UNIT I: BASICS OF CONSTRUCTION

Definition, introduction and Basics of Construction, Unique features of construction, Construction projects types and features, Phases of a project, Agencies involved and their methods of execution.

UNIT II: CONSTRUCTION PROJECT PLANNING

Stages of project planning: pre-tender planning, pre-construction planning, detailed construction planning, Co Role of client and contractor, Process of development of plans and schedules, hoI work break-down structure, activity lists, assessment of work content, concept of productivities, Ho estimating durations, sequence of activities and utility data; Techniques of planning- Bar charts, Gantt Charts, Co Networks: the terminology, types, relationships, preparation of CPM networks: PERT analysis.

UNIT III: CONSTRUCTION METHODS BASICS

The Types of foundations and construction methods; Basics of Formwork and Staging; Common building construction methods, Modular construction methods for repetitive works, Uti Precast concrete construction methods, Ut Basic construction methods for steel structures; Basics of construction methods for Bridges.

UNIT IV: CONSTRUCTION EQUIPMENT BASICS

Conventional construction methods Vs Mechanized methods and advantages, Equipment for Earthmoving, Dewatering, Equipment for Concrete mixing, transporting & placing; Cranes, Hoists and other equipment for lifting; Equipment for transportation of materials. Equipment Productivities.

UNIT V: PLANNING AND ORGANIZING CONSTRUCTION SITE AND RESOURCES

site layout including enabling structures, developing site organization, Documentation at site, Manpower: planning, organizing, staffing, motivation, Materials: concepts of planning, procurement and inventory control, Pe Equipment: basic concepts of planning and organizing, Funds: cash flow, sources of funds; Histograms and S-Curves. Earned Value, Resource Scheduling- Bar chart, line of balance technique, resource constraints and conflicts; resource aggregation, allocation, smoothing and levelling. Common Good Practices in Construction.

UNIT VI: PROJECT MONITORING & CONTROL

Supervision, record keeping, periodic progress reports, periodical progress meetings. Updating of plans, B Basics of Modern Project management systems such as Lean Construction; Use of Building Information Modelling (BIM), Quality control: concept of quality, quality of constructed structure, use of manuals and checklists for quality control, role of inspection, basics of statistical quality

control, Dd Safety, Health and Environment on project sites: accidents; their causes, effects and its preventive measures.

UNIT VII: CONTRACTS MANAGEMENT BASICS

Importance of contracts; Types of Contracts, parties to a contract, Gg Common contract clauses (Notice to proceed, rights and duties, Dd Contract Duration and Price, Dd Performance parameters; Delays, penalties and liquidated damages; Force Majeure, Dd Dispute Resolution methods. Acts and Rules.

UNIT VIII: CONSTRUCTION COSTS.

Dd Make-up of construction costs; Dd Classification of costs, Dd Time cost trade-off in construction projects, compression and decompression.

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Varghese, P.C., "Building Construction", Prentice Hall India, 2007.
2. Nunnally, S.W. Construction Methods and Management, Prentice Hall, 2006
3. Jha, Kumar Neeraj., Construction Project management, Theory & Practice, Pearson Education India, 2015
4. Punmia, B.C., Khandelwal, K.K., Project Planning with PERT and CPM, Laxmi Publications, 2016.
5. Peurifoy, R.L. Construction Planning, Methods and Equipment, McGraw Hill, 2011
6. Chudley, R., Construction Technology, ELBS Publishers, 2007.
7. National Building Code, Bureau of Indian Standards, New Delhi, 2017.

SEMESTER-VI

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
ISES 302	Industry Specific Employability Skills VI	HS	1	1	0	0

UNIT I

Antonyms, synonyms, odd words, Idioms and phrasal verbs, same word with different part of speech, Word analogy. Sentence completion.

UNIT II

Text completion, Sentence equivalence, Introduction to Different Parts of an Argument in Reasoning, Assumption of an Argument, strengthening of an Argument, Weakening of an argument.

UNIT III

Para jumbles, Sentence Completion & Text Completion, Reading Comprehension, Identification of errors, Sentence correction, Resume writing, Cover letter.

UNIT IV

GD, PI

TEXTBOOKS/REFERENCE BOOKS/OTHER READING MATERIAL

1. Verbal Ability and Reading comprehension-Sharma and Upadhyay.
2. Charles Harrington Elstor, Verbal Advantage: Ten Easy Steps to a Powerful Vocabulary, Large Print, September 2000.
3. GRE Word List 3861 – GRE Words for High Verbal Score, 2016 Edition.
4. The Official Guide to the GRE-General Revised Test, 2nd Edition, Mc Graw Hill Publication.
5. Soft Skills Training: A Workbook to Develop Skills for Employment Book by Frederick H. Wentz.
6. The Resume Writing Guide: A Step by Step Workbook for Writing ...Book by Lisa McGrimmon.

SEMESTER-VIII

Course Code	Course Name	Course Category	CREDITS			
			L	T	P	C
CE 502	Capstone Project	PR	0	0	24	12

Capstone Project Guidelines

Introduction

These guidelines are conceived as a set of procedures stating broad expectations from both students and mentors of the Capstone project which is part of the B.Tech Civil curriculum. These guidelines are intended to make the project work evaluation process easier, formal and more authentic. The Capstone Project is in 8th semester. The total number of credits offered for the capstone project is 12. The Capstone project has to be sufficiently complex and feasible so as to be considered for 12 credits. The evaluation of the project is done by a review panel comprising department faculty members and the review process is continuous. In the first review by the constituted panel, the project may be accepted or rejected or major/minor changes can be suggested.

Project Selection

Capstone project may be an in-campus project or can be mapped with internship carried out in the industry or the research internship carried out in the other premier Universities in India/Abroad.

In campus project: The idea for student's Project may be a proposal from a faculty member or student's own, or perhaps a combination of the two. The project has to be sufficiently complex and feasible. Students are advised to choose a project that involves a combination of sound background research, a solid implementation, or piece of theoretical work, and a thorough evaluation of the Project's output. Interdisciplinary Project proposals and innovative Projects are encouraged and more appreciable.

Mapping with any Internship:

1. Any type of internships can be carried out by the students in the 8th semester after getting the due approval from the Project coordinator and the Head of the department.
2. The internship period has to be a minimum of 10 weeks of duration in the semester and the students could have carried out the practical work for at least 180 hrs during this period.
3. The internship has to involve some Software/Hardware design and implementation component and/or research component and the complexity of this work is expected to match the requirements of Capstone Project work.

Mentor allocation process: Students can form a batch of 4 (5 may be allowed in exceptional cases on the discretion of the project coordinators) and select their mentor provided the Faculty member accepts them and the faculty member has less than the specified number projects under his/her mentorship.

Project Equipment: In case of deserving projects for limited financing of equipment, the students can approach the concerned university authorities following due procedure.

Meetings with Your Supervisor:

Instructions to students: You must make sure that you arrange regular meetings with your Mentor. The meetings may be brief once your project is under way, but your Mentor needs to know that your work is progressing. You are also expected to be contactable throughout the project. You should

inform the Mentor your contact details and keep these updated if these change.

Instructions to Mentors: Mentors are advised to maintain a project diary depicting attendance of student and progress of project.

Legal and Ethical Considerations: If a student want to do some project with some company where their relatives or friends work, the details need to be disclosed to their mentor. The mentor has to report the same to the project coordinators for permission. Again, if a student doing internship with a company, the data, procedures/algorithms and software developed may be classified and may not be allowed to submit in the report. The students need to consider that before requesting mapping.

Project Report format: Format of the report is similar to the format of standard Journal papers published. (Abstract-Literature survey-Methodology-Algorithms-Simulation-Results-explanation of results-Future work etc)

Project milestones and Assessment

Starting date of the project to be taken as the commencement date of 8th semester. A student is expected to finish the project in the same semester. The students are expected to plan from the beginning for at least one research publication in a reputed journal.

8th Semester:

Stage 1: Title, Scope of the project and Literature survey to be submitted within 2 weeks from the commencement of the project. In the first review by the constituted panel, the project may be accepted or rejected or major/minor changes can be suggested.

Stage 2: Methodology, Requirement analysis and Deliverables to be submitted within 6 weeks from the commencement of the project.

Stage 3: Project design and implementation plan have to be submitted within 8 weeks of the commencement of the 8th semester. Internal review will be conducted by the Mentor and this review has a weightage of 50%.

Stage 4: Project (Software/Hardware) implementation to be done and demonstrate that the project meets the requirements and expectations.

Stage 5: The results need to be analysed and if any fine tuning required is to be done.

Final evaluation: by expert committee at the end of the 10th week and this evaluation has a weightage of 50%.

**OPEN
ELECTIVES
SEMESTER III**

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 408	Construction Materials	OE	3	0	2	4

UNIT I: OVERVIEW OF CONCRETE AND CONSTRUCTION MATERIALS

Nature and advantages of concrete, Overview of various construction materials, Overview of Cement, Overview of fine and coarse aggregates, Properties of water, Role of chemical and mineral admixtures.

UNIT II: CEMENT

Manufacture and composition of cement, Modified portland cements, Specifications and tests for portland cements, Chemistry of hydration, Properties of hydration products, Microstructure and properties of hydrated cement paste, Blended cements, fly ash and slag, Effect of fly ash and slag on properties of fresh and hardened concrete.

UNIT III: WATER, AGGREGATES AND ADMIXTURE

Water quality, classifications and properties of aggregates, nonstandard aggregates, use of chemical admixture, water reducing admixture, admixture for set control.

UNIT IV: PROPERTIES OF CONCRETE, CURING CONDITIONS AND MIX DESIGN

Workability and properties of fresh concrete, Factors influencing workability, setting of concrete and tests for fresh concrete, Finishing of concrete and role of curing temperature, Tests for compressive strength, Quality assessment of concrete and other methodologies, Fundamentals of mix design, Mix design as per BIS Method.

UNIT V: DURABILITY AND SPECIAL CONCRETES

Permeability of concrete, Physical attack, Chemical attack-carbonation, Sulphate attack and chloride attack, High strength concrete, Self-compacting concretes, Lightweight concretes and other concretes.

TEXT BOOKS

- Shetty, M. S., and Jain, A K., "Concrete Technology: Theory and Practice", 8th Edition, S, chand publications., New Delhi, 2019.

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
ECE 418	Machine Learning	OE	3	0	2	4

UNIT I

Introduction to machine learning, Supervised and Unsupervised Learning, Linear Regression, Logistic Regression, Generalized Linear Models.

UNIT II

Gaussian Discriminant Analysis (GDA), Naive Bayes, Support Vector Machines, K-Nearest Neighbor, Decision Trees, Random forest.

UNIT III

Clustering in Machine Learning, Different Types of Clustering Algorithm, K-Means Clustering, Gaussian Mixture Models, Bias-variance trade off.

UNIT IV

Introduction to Neural Networks, Feed-forward Network, Gradient descent optimization, Error Backpropagation, Evaluation of error-function derivatives, Efficiency of backpropagation, under and over fitting.

UNIT V

Introduction to Convolutional neural network (CNN), Backpropagation in CNN, Sparse Kernel Machines, Markov Chain Monte Carlo, Introduction to Reinforcement learning.

TEXTBOOKS/REFERENCES

1. Christopher M. Bishop, "Pattern Recognition and Machine Learning" by Springer, 2007.
2. Tom M. Mitchell, "Machine Learning", First Edition by Tata McGraw-Hill Education, 2013.
3. Ethem Alpaydin, "Introduction to Machine Learning" 2nd Edition, The MIT Press, 2009.

LIST OF PRACTICAL EXPERIMENTS

1. Implement Linear Regression on the given dataset using python/MATLAB.
2. Implement Naïve Bayes classifier using Python/MATLAB.
3. Implement Logistic Regression on the given dataset using python/MATLAB.
4. Implement SVM algorithm using Python/MATLAB.
5. Implement Decision tree classifier and Random Forest classifier using python/MATLAB.
6. Implement Random Forest classifier using python/MATLAB.
7. Implement K-means algorithm for clustering the data using python/MATLAB.
8. Implement K-Nearest Neighbour classifier using python/MATLAB.
9. Emulate logic gates using neural Network using python.
10. Implement single-Layer Neural Network for image/data analysis using Python/MATLAB.
11. Implement Convolution Neural Network for image/data analysis using Python/MATLAB.
12. Implement Markov model for analysis of stock market data using python/MATLAB

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
EEE 422	Optimization Techniques	OE	3	0	0	3

UNIT: I UNCONSTRAINED OPTIMIZATION

Basics: Set-constrained and unconstrained optimization; conditions for local minimizers, One-dimensional search methods: golden section, Fibonacci, bisection, Newton's and Secant methods; bracketing; line search, Gradient methods: steepest descent method; analysis of gradient methods.

UNIT: II METHODS

Newton's method: analysis; Levenberg-Marquardt modification; nonlinear least squares, Conjugate Gradient method: conjugate direction algorithm; conjugate gradient algorithm; non-quadratic problems, Quasi-Newton method: approximating the inverse Hessian; rank-one correction; DFP and BFGS algorithms, Least-squares analysis; RLS; linear equation with minimum norm; Kaczmarz's algorithm; general solution.

UNIT: III LINEAR PROGRAMMING

Linear Programming: standard form; convex polyhedral; basic solutions and properties, Simplex method: canonical augmented matrix; algorithm; matrix form; two-phase; revised method, Duality: Dual linear programs and properties.

UNIT: IV EQUALITY AND INEQUALITY CONSTRAINTS

Equality constraints: Problem formulation; tangent and normal spaces; Lagrange conditions; second-order conditions; minimizing quadratics with linear constraints, Inequality constraints: Karush-Kuhn Tucker conditions; second-order conditions.

UNIT: V CONSTRAINED OPTIMIZATION

Convex optimization: convex functions, convex optimization problems; semi-definite programming, Algorithms: Projections; projected gradient with linear constraints; Lagrangian algorithms; penalty methods, Multi-objective Optimization: Pareto solutions, Pareto front computation, from multi-objective to single-objective optimization; uncertain LP problems.

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
ME 418	Introduction to Electric Vehicles	OE	3	0	0	3

UNIT I: INTRODUCTION

History, EV Benefits, EV/HEV subsystems and configurations.

UNIT II: VEHICLE DYNAMICS

Vehicle dynamics, forces acting, power and torque calculations, Simulations, Drive cycles.

UNIT III: BATTERIES

Battery parameters, why Li, SoH & SoC estimation/self-discharge, Battery pack design/development, battery computations, Charging, BMS and its design, future batteries.

UNIT IV: ELECTRICAL COMPONENTS FOR EV AND HEV

EV Motors (IM, PM etc,) D-q circuit, DC-DC converters, DC-AC converters, control system overview.

UNIT V: EV DESIGN

Mechanical, Electrical and Thermal design consideration, Sample design calculations for EV and HEV's.

TEXTBOOKS

1. Iqbal Hussein, Electric and Hybrid Vehicles: Design Fundamentals, CRC Press, 2003.
2. Electric Powertrain - Energy Systems, Power electronics and drives for Hybrid, electric and fuel cell vehicles by John G. Hayes and A. Goodarzi, Wiley Publication.

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
IDEA 102	Design Thinking	OE	3	0	0	3

UNIT I: INTRODUCTION TO DESIGN THINKING

Design Thinker's mindset, what is Design Thinking and why is it popular? Innovative thinking, what is a wicked problem and how can we solve it? The design thinking stages overview.

UNIT II: DESIGN THINKING - EMPATHISE

Power of Empathy, Probes for context mapping, Power of stories in building empathy for the target group, User Research methods -Qualitative user research, best practices of qualitative user research, best practices of qualitative user research. Conducting ethical user research. Basics of recruiting participants for user research.

UNIT III: DESIGN THINKING – DEFINE/REDEFINE THE CHALLENGE

Define problem, Frame insights, Understand context.

UNIT IV: DESIGN THINKING – IDEATE

Brainstorm and ideate, Divergence to Convergence, Creative confidence.

UNIT V: DESIGN THINKING – PROTOTYPE & TEST

Prototype to product, Prototyping methods, Heuristic Evaluation, Project 1 (in teams)-Applying Design thinking, Empathy & Ideation, principles & tools. Project 2 (in teams)-Applying Design thinking/Innovation principles and approach using specific tools. Storytelling -Role of Storytelling in Design thinking.

INSTRUCTIONAL METHOD

1. The course delivery method will be through online platforms (Zoom is preferred due to the breakout rooms options) depend upon the requirement of content and need of students. This will be an experiential learning throughout the course.
2. The internal evaluation will be done based on continuous evaluation of students in the hands-on workshop assignments and classroom.
3. Practical examination will be conducted at the end of semester for evaluation of performance of students in their given projects and also through questionnaire-based exam.

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
MAT 305	Introduction to Science and Technology Studies	OE	4	0	0	4

UNIT I: PHILOSOPHY OF SCIENCE: ISSUES AND PERSPECTIVES

What is science? Some Historical Background, Scientific reasoning- Induction, deduction and the problem of Hume, Scientific Explanation and Causality, Popper's Philosophy of Science, Scientific Revolutions.

UNIT II: PERSPECTIVES FROM SOCIOLOGY OF SCIENCE AND TECHNOLOGY

Questioning Functionalism in the Sociology of Science, The strong program, The social construction of Scientific and technological realities, Studying laboratories.

UNIT III: SCIENCE, TECHNOLOGY AND DEVELOPMENT: A CRITICAL ENQUIRY

Medicine, Agriculture, Environment, War.

UNIT IV: EXCLUSIONS IN SCIENCE AND TECHNOLOGY INSTITUTIONS

Under presentation of women in Science and Technology Institutions in India and abroad, Autobiographical Accounts, The Caste of Merit- excerpts.

UNIT V: FEMINIST AND OTHER CRITIQUES OF SCIENCE

The Mis-measure of Man IQ tests, Craniometry, Examples of how gender figures in doing science, The Medical Construction of gender: The case of Intersex babies, Feminist epistemologies of Science, Hidden Figures Movie

PSY 111	Psychology for Everyday Living	OE	4	0	0	4

UNIT I: MYTHS AND MISCONCEPTIONS IN PSYCHOLOGY

Definition, nature and goals of psychology, Common myths and misconceptions about psychology, Schools of psychology; Basic and applied areas of psychology

UNIT II: THE ROLE OF PERCEPTION AND ATTITUDE TOWARDS UNDERSTANDING THE WORLD

Perception: Understanding perception, Gestalt laws of organization, common illusions, Perceptual constancy - depth perception, size perception, perception of movement, Attitude formation, Attitude change.

UNIT III: INTELLIGENCE AND LEARNING

Definitions and nature of intelligence, Emotional and social intelligence; Measuring IQ, EQ and SQ, Fundamentals of learning and its applications, Memory techniques.

UNIT IV: UNDERSTANDING THE SELF

Definition; Approaches to personality – trait and type, Psychoanalytical and humanistic theory, Tests of personality – MBTI and NEO-PI, Identity; Self-concept, self-esteem and self-efficacy.

UNIT V: STRESS, COPING AND QUALITY OF LIFE

Nature, sources of stress and its reactions, Factors influencing stress, coping with and managing stress - cognitive and behavioral techniques, Improving quality of life.

PSY 116	Fundamentals of Neuro Linguistic Programming-Level 1	OE	3	0	0	3

UNIT I: WHAT IS NLP?

Introduction to NLP, NLP Frames, NLP Presuppositions – Beliefs of Excellence. The Communication Model (Deletion, Distortion and Generalization) Components of the NLP Communication Model.

UNIT II: META PROGRAMS

Sensory Acuity and Calibration, Representation System (Modalities), Sub modalities Practicing Sub modalities, Identifying your primary representational system.

UNIT III: ANCHORING

Eye Accessing Cues Rapport – Unconscious responsiveness. State: Introduction to states, Anchoring Process, State Elicitation Summary, Stacking Anchors, Stacking Anchors Summary (X, Y, Z state).

UNIT IV: WELL-FORMED / WELL-DEFINED OUTCOMES

Pain and Pleasure exercise, Wellness Vision Planning (Wheel of Life) Ardell's model for Wellness Coaching. T-F-A-R Coaching Model Timeline Coaching.

UNIT V: COACHING PATTERNS

New Behaviour Generator, Circle of Excellence – Resourceful States. Walt Disney Strategy, Reframing Coaching using values Perceptual Positions (Relationship Coaching / Leadership Coaching).

TEXTBOOKS/REFERENCES

1. NLP The New Technology of Achievement – Edited by Steve Andreas and Charles Faulkner.

Course Code	Course Name	Course Category	Credits			
			L	T	P	C
BIO 112	Basic Microbiology	OE	4	0	0	4

UNIT I: INTRODUCTION TO MICROBIOLOGY

History of microbiology, Essential methods to study microbes: sterilization and disinfection: Methods of sterilization- physical methods (heat, filtration), radiation and chemical methods, Principles of microscopy, Spontaneous generation vs. biogenesis. Contributions of Anton von Leeuwenhoek, Louis Pasteur-germ theory of disease, Robert Koch- Koch's postulates, Joseph Lister, Alexander Fleming, Microbial growth, Growth media types - selective and differential media; Influence of environmental factors for microbial growth. Growth phases and kinetics; Maintenance and preservation of bacterial cultures.

UNIT II: BACTERIAL CELLS - STRUCTURE AND FUNCTION

Different groups of microorganisms and their general characteristics, Ultrastructure of Gram positive and Gram-negative bacterial cell wall, Size, shape and arrangement of bacterial cells. cell membrane, cytoplasmic matrix, pili, capsule, flagella Classification & molecular taxonomy-Phylogenetic tree; measuring diversity by 16S/18S rRNA, RAPD, T-RFLP.

UNIT III: MOLECULAR PATHOGENS

Viral structure and classification; Bacteriophage and its life cycle; Viral pathogenesis; Immune response to viral infections; Acute, chronic and latent viral infections; Viral vaccines, Viroid, Prions, Plasmid and transposable elements.

UNIT IV: MICROBIAL DISEASE AND ANTIMICROBIAL AGENTS

Microbial disease: - Tuberculosis, Typhoid, Infection caused by E. coli, Staphylococcus, Streptococcus, Role of quorum sensing and biofilm in microbial disease, Action of antimicrobial drugs: inhibitors of cell wall synthesis, inhibitors of protein synthesis, inhibitors of nucleic acid synthesis, competitive inhibitors, antifungal, antiviral, anti- protozoan drugs, Mechanism of antibiotic resistance.

UNIT V: APPLIED MICROBIOLOGY

Microorganism of Industrial use, Basics of fermenter design, Primary and secondary metabolites, Strains-screening, adaptation and strain improvement Industrial production of antibiotics – penicillin; alcohol- ethanol. Food microbiology – Microorganisms in food, Introduction to probiotics and prebiotics, Food preservation Environmental microbiology – Bioremediation, Bioleaching, Microbial degradation of textile waste.

			L	T	P	C
PHY 223	Introduction to Quantum Computation	OE	3	1	0	4

UNIT I: MATRIX, TENSOR AND DIRAC NOTATION

Basis vectors and orthogonality, Matrices Hilbert spaces, Inner and outer products, Tensors in index notation, Metric tensors, covariant and contravariant tensors, Unitary operators and projectors, Hermetian operator, Adjoint of operator, Wavefunction as vector and operator as metrics, Dirac notation, Tutorial 1, Tutorial 2, Tutorial 3.

UNIT II: INTRODUCTION AND OVERVIEW OF QUANTUM MECHANICS

Photon, Concept of Planck Constant, Photoelectric effect, Wave particle duality, Wave packet, Davisson and Germer Experiment, Superposition Principle, Young Double slit experiment, Qubits and pieces, Concept of Bloch sphere, Derivation on Bloch sphere representation, Tutorial 4, Tutorial 5, Tutorial 6.

UNIT III: FUNDAMENTALS OF QUANTUM COMMUNICATION

No-cloning theorem, Hidden Information of state, Einstein-Podolsky-Rosen Paradox, Bell states, Bell inequalities, Bell inequalities – Examples, Quantum entanglement, Quantum entanglement considering Heisenberg principal, Quantum teleportation, Tutorial 7, Tutorial 8, Tutorial 9.

UNIT IV: QUANTUM GATE

Pauli Gates, Phase Gate, Controlled phase shift, Hadamard gates, SWAP Gates, CNOT Gates, Toffoli gates, Combination of Gates, Circuit of Gates, Tutorial 10, Tutorial 11, Tutorial 12.

UNIT V: QUANTUM ALGORITHM, KEY DISTRIBUTION AND ERROR

Deutsch algorithm, Deutsch-Josza algorithm, Shor's Algorithm – Periodicity, Shor's period-finding algorithm, Introduction to Quantum key distribution, BB84 protocol, Quantum Error Correction, Quantum Error Correction Example, Physical Qubits, Tutorial 13, Tutorial 14, Tutorial 15.

HIS 005	Introduction to Gender	OE	4	0	0	4

UNIT I: THE NATION AND ITS MANY ROOTS

What is a Nation? –Theories of Nationalism, The many names of India: India, Hindia, Aryavarta or Bharat, Mother India: Iconising a Nation

UNIT II: UNEARTHING THE PAST

The Evolutionary Past: Interbreeding Vs Replacement Theory, Out of Africa Theory, what is a civilization? Theories of Civilization, Indus Valley Civilization

UNIT III: STORIES OF GODS AND PEOPLE

The Emergence of Myths, Myth Vs Reality, Vedic Age in India, Tribes, Caste and Battles.

UNIT IV: POLITY AND GOVERNANCE

Religion, Economy and the State –Asoka, Chankya and the Buddha, Land and the Economy: Exploring the Arthashastra, Social Order and the State: Through the Epics, Two millennia of pluralism: Jews, Christians and other religions in India.

UNIT V: TOWARDS UNDERSTANDING THE NATION

The Mughals in India, Multiple Identities – the same heritage, The Past as a Signifier

TEXTBOOKS

UNIT I: PERFORMANCE OF INDIAN ECONOMY SINCE 1947

Growth and Structural Changes, Features/characteristics of Indian economy, Human Development Index Traditional Methodology, Human Development Index: New Methodology, Sustainable Development, Capital Formation, Demographic Transition, Economic Planning in India, Reforms in Indian Economy.

UNIT II: KEY ISSUES OF INDIAN ECONOMY

Issues and Trends of Unemployment, Poverty in India, Problem of Inequality, Issues of Education, Gender Issues in India.

UNIT III: STRUCTURAL PERFORMANCE OF INDIAN ECONOMY

Importance and Features of Indian Agricultural, Trends in Performance and Productivity, Agricultural Markets and Institutions, Land Reforms, Green Revolution in Indian Agriculture, Agricultural Labour, Food Security, Public Distribution System, Trends, Productivity, and Growth of Industries, Industrial Policy in India, Industrial Sickness Small Scale Industries, Foreign Direct Investment in India.

UNIT IV

Trends and Performance in Services, WTO, India Foreign Trade, Monetary Policy, Fiscal Policy, Total contact hours.

UNIT I: THE REPRESENTATIONAL HIERARCHY

Introduction to the Triune Brain Model, Information Processing by the triune brain, The Visual, Auditory and Kinesthetic Learning Styles. The impact of belief & perception on language.

UNIT II: THE MAP IS NOT THE TERRITORY

The Beliefs of Excellence, Identifying the inner map, Asking Clean question, Arriving at well-formed outcome.

UNIT III: DECODING THE MAP

Introduction to the meta programs, Comprehending the thirteen filters, Sub modalities – an insight, Using sub modalities as a tool for change.

UNIT IV: REPROGRAMMING LANGUAGE

Meta Modelling – an overview, the three critical filters: Deletion, Distortion, Generalization, The Filter and Need connect, The Milton Model: Language to influence.

UNIT V: FROM PROGRAMMING TO REPROGRAMMING

The Role of Tools & Techniques in Language Re programming, The archetypes and corresponding metaphors, Demonstration of a few tools & techniques like Swish, Perceptual Positions, Coach & Crash, and Tetralema, Hands on sessions.

			L	T	P	C
MAT 307	Combinatorics and Graph Theory	OE	4	0	0	4

UNIT I: COUNTING PRINCIPLES AND TECHNIQUES

Combinatorics and Permutations, Binomial Coefficients and Multinomial Coefficients, The Pigeonhole Principle, the inclusion-Exclusion formula, Generating Functions: Newton's Binomial Theorem, Exponential Generating Functions, Partitions of Integers, Recurrence relations.

UNIT II: SPECIAL COUNTING NUMBERS

Partition number, Bell Numbers, Catalan numbers, Stirling numbers, Ramsey Numbers. System of distinct representatives.

UNIT III: AN INTRODUCTION TO GRAPH THEORY

Euler Circuits and Walks, Hamiltonian Cycles and Paths, Bipartite Graphs, Trees, Plane and planar graphs, Directed graphs.

UNIT IV: MORE ON GRAPH THEORY

Optimal Spanning trees, Connectivity, Colouring Planar Graphs, The Chromatic Polynomials, Graph of Symmetries, Burnside's Theorem.

UNIT V: APPLICATIONS

Problems involving scheduling and assignment, Isomer problem in Chemistry, If time permits, we also discuss a few applications in Computer Science: To prove lower bounds in computational models, Randomized algorithms, and various net- work problems.

COURSE DESCRIPTION

This course is the first semester of four that forms an introduction to standard Mandarin Chinese and is designed for students with no previous background in spoken or written Mandarin. Students in this course focus on learning essential vocabulary, practicing pronunciation, and understanding simple grammatical structures. This knowledge prepares students to effectively communicate in Mandarin on a limited range of topics related to everyday situations and examine how culture and language interact. In-class activities and course assignments aim to assist students as they develop the oral proficiency and confidence necessary to initiate simple conversations. Out-of-classroom experiences such as cultural activities or guided interactions with native speakers supplement formal classroom instruction and provide ample opportunities for practical engagement.

TEXTBOOK & COURSE MATERIALS

1. A Course in Contemporary Chinese Volume 1 《當代中文課程 1》 by the Mandarin Training Center at National Taiwan Normal University. Publisher: Sanctum Books; First Indian edition (31 March 2021)
2. Supplementary vocabulary & cultural materials

METHOD OF INSTRUCTION

This course is delivered through a series of classroom instruction sessions, activities, homework, in-class practice, and non-classroom structured activities. All four skills of language learning (listening, speaking, reading, and writing) will be covered, with a particular focus on communication skills necessary in Chinese culture.

PART 2: OUTCOMES

1. This course will help student master Mandarin pronunciation, basic reading and writing skills, and to develop the ability to participate in simple, practical conversations on everyday topics.
2. In this course, students will learn to greet, to introduce themselves, to communicate with other people in Mandarin Chinese, and have basic knowledge and ability in Mandarin Chinese.

STUDENT LEARNING OUTCOMES

1. By the completion of this course, students will be able to:
2. Use Mandarin Chinese to confidently communicate on a range of topics related to everyday situations such (e.g. to introduce themselves, discuss family, hobbies, likes and dislikes).
3. Recognize and write approximately 150 Chinese characters.
4. Read and write simple sentences in Chinese.
5. Demonstrate listening comprehension in a number of simple circumstances

KNOWLEDGE OUTCOMES

1. This course is designed to assist students to acquire and demonstrate knowledge about:
2. Essential vocabulary, pronunciation, and grammatical structures.
3. Understand how Chinese culture and Mandarin Chinese interact.
4. The differences and similarities between Chinese and the student's native language.

SKILLS OUTCOMES

1. This course is designed to assist students in acquiring or enhancing the following skills:

2. Basic communication skills in Mandarin Chinese.
3. Competency with the Pinyin-Chinese phonetics system.
4. Ability to read and write Chinese characters.
5. Confidence to initiate simple conversations with other people.

PART 3: TOPIC OUTLINE/SCHEDULE

WEEK 01: INTRODUCTION, GREETING.

1. Introduction of Mandarin Chinese & Pinyin (the Chinese phonetic system)
2. Greetings in normal and polite ways.

WEEK 02: LEARNING TO INTRODUCE PEOPLE.

1. Basic sentences with “是shì”
2. Answering question with “什麼shéme”
3. Way to ask questions with A-not-A and “嗎ma” in Chinese

WEEK 03: LEARNING TO DISCUSS LIKES/DISLIKES.

1. Answering question in Chinese (Affirmative and Negative answers with “不bù”)
2. Modification Marker “很hěn”
3. Contrastive question with “呢ne”

WEEK 04: LEARNING TO TALK ABOUT PEOPLE IN MY FAMILY MEMBERS AND THEIR NAMES.

1. Asking question with “幾jǐ”
2. Basic sentences with “有yǒu”

WEEK 05: LEARNING TO DESCRIBE PEOPLE, PLACES, AND POSSESSIONS.

1. Possessive word “的de”
2. Modifier Marker “的de”

WEEK 06: LEARNING TO TALK ABOUT THE NUMBER OF PEOPLE IN A FAMILY, PARTIAL EXAM.

1. Totality “都dōu”
2. Measure word “個ge” and “張zhāng”
3. Partial exam for Oral & writing

WEEK 07: LEARNING TO DESCRIBE LIKES/DISLIKES (E.G., SPORTS AND MOVIES).

1. Time words & Hobbies
2. To go do something with “去qù”
3. Placement of time words

WEEK 08: LEARNING TO EXPRESS WHAT TWO GROUPS HAVE IN COMMON.

1. Topic sentences
2. Word order in sentences (Chinese sentence orders, difference between English and Chinese)
3. The word order of Adverbs “也yě”, “都dōu” and “常cháng”

WEEK 09: LEARNING TO POLITELY ASK OTHERS OPINIONS AND MAKE SIMPLE SUGGESTIONS.

1. Asking question with “怎麼樣zěnmeyàng”
2. Particles with “吧ba” and “啊a”

WEEK 10: LEARNING TO FORM CHOICE QUESTIONS, FINAL EXAM

1. Asking choice question with “還是háishì”
2. Making sentences with “覺得juéde”
3. Final exam for Oral & writing

PART 4: GRADING POLICY

EVALUATION CRITERIA

The grade for this course will be based on the following table.

Percentage (%)	Evaluation Area
60	Classroom performance (including performance of the basic conversation, participation in class activities, quizzes, and / or homework)
10	Partial Exam – Oral
10	Partial Exam – Writing
10	Final Exam – Oral
10	Final Exam – Writing
100	Total Points Possible

LATE WORK POLICY

Be sure to pay close attention to deadlines—there will be no make up assignments or quizzes, or late work accepted without a serious and compelling reason and instructor approval.

GRADING SCALE

Final grades assigned for this course will be based on the percentage of total points earned and are assigned as follows:

Letter Grade	Corresponding Percentage Points	Performance
A	93-100%	Excellent Work
A-	90-92%	Nearly Excellent Work
B+	87-89%	Very Good Work
B	83-86%	Good Work
B-	80-82%	Mostly Good Work
C+	77-79%	Above Average Work

Letter Grade	Corresponding Percentage Points	Performance
C	73-76%	Average Work
C-	70-72%	Mostly Average Work
D+	67-69%	Below Average Work
D	60-66%	Poor Work
F	0-59%	Failing Work

PART 5: COURSE POLICIES

ATTEND CLASS

Students are expected to attend all regularly scheduled classes and come prepared to participate fully in class activities. Students are further expected to be on time for all classes. Arriving late for class or an activity is disrespectful of both the instructor and fellow students.

PARTICIPATE

The participation grade will depend on both the quality and the quantity of student's comments and questions and shall account for a portion of the total course grade.

BUILD RAPPORT

If you find that you have any trouble keeping up with assignments or other aspects of the course, make sure you let your instructor know as early as possible. As you will find, building rapport and effective relationships are key to becoming an effective professional. Make sure that you are proactive in informing your instructor when difficulties arise during the semester so that they can help you find a solution.

COMPLETE ASSIGNMENTS

Assignments must be submitted by the given deadline or special permission must be requested from instructor before the due date. Extensions will not be given beyond the next assignment except under extreme circumstances.

All discussion assignments must be completed by the assignment due date and time. Late or missing discussion assignments will affect the student's grade.

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 402	Advanced Environmental Engineering	TE	3	0	0	3

UNIT I: INTRODUCTION

Introduction: Wastewater Characteristics, Standards of disposal, Treatment objectives and

Strategies, Layouts of Primary, Secondary and Advanced Treatment Units. Wastewater quality parameters.

UNIT II: DESIGN OF PRIMARY TREATMENT OPERATIONS

Design of preliminary and primary treatment operations: Screens, Grit Chambers, Skimming Tank, Primary and Secondary Sedimentation Tanks.

UNIT III: BIOLOGICAL TREATMENT PROCESSES

Objectives — Selection of Treatment Methods — Principles, Functions, Types, Attached Growth Processes: Trickling Filters (Standard Rate, High Rate), Biofilters, Practices, Features and Design, Operational Difficulties and Remedial Measures, Rotating Biological Contactors.

Activated Sludge Process, Design Criteria, Oxygen and Nutrient Requirements -Classification and Design of Oxidation Ponds, Lagoons.

UNIT IV: SLUDGE TREATMENT AND DISPOSAL

Sludge Treatment and Disposal: Sludge Thickening, Aerobic and Anaerobic Sludge Digestion Processes Sludge Dewatering, Ultimate Disposal, Sludge Drying Beds, Other Methods of Sludge Treatment.

TEXTBOOKS

1. S.K. Garg, Environmental Engineering: Sewage Disposal and Air Pollution Engineering (Volume - 2)
2. Howard S. Peavy, Donald R. Rowe and George Tchobanoglous , Environmental Engineering.
3. B.C. Punmia and Ashok Kumar Jain, Wastewater Engineering (Including Air Pollution).
4. Wastewater Treatment –Concepts and Design Approach, by G L Karia and R A Christian, Prentice Hall of India, 2006.

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 403	Advanced Pavement Engineering	TE	3	0	0	3

UNIT I: PAVEMENT EVALUATION

Functional and Structural Evaluation – Intro, Functional evaluations - Merlin, Bump Integrator,

Functional evaluations - Merlin, Bump Integrator, Pavement Distress Surveys – Flexible, Pavement Distress Surveys – Rigid, Automatic Distress Surveys - Network Survey Vehicles (NSV), Structural Evaluation – Benkleman Beam Deflectometer (BBD) and overlay design, Falling Weight Deflectometer (FWD).

UNIT II: PAVEMENT MANAGEMENT SYSTEMS (PMS)

Pavement Condition Index (PCI), Pavement asset management principles, Maintenance and rehabilitation treatments, Introduction to PMS Decision Trees, Life Cycle Cost Analysis, Cost/Benefit Ratio.

UNIT III: ADVANCES IN PAVEMENT MATERIAL CHARACTERIZATION

HMA Volumetric Relationships, Superpave Mix Design, Performance Testing – HMA Dynamic Modulus, Aggregate and Soil Resilient Modulus, Bitumen Dynamic Shear Rheometer (DSR).

UNIT IV: ADVANCES IN PAVEMENT DESIGN PRACTICES

AASHTO 1993 Design Method, PaveXpress Software – Tutorial, AAHSTOWare Pavement ME Design (PMED).

UNIT V: SUSTAINABLE PAVEMENT MATERIALS AND METHODS

Recycled Asphalt Pavement Technology, Cold Mix and Warm Asphalt Technology, Porous Asphalt Pavement Technology, Rubber and Waste Plastic Road Technology.

TEXTBOOKS

1. Yang H. Huang, Pavement Analysis and Design, 2nd edition, Pearson Education, India
2. Partha Chakraborty and Animesh Das, Principles of Transportation Engineering, Prentice Hall India.
3. Rajib B. Mallick, and Tahar El-Korchi, Pavement Engineering Principles and Practice, Third Edition, CRC Press.
4. M. Rashad Islam and Rafiqul A. Tarefder, Pavement Design: Materials, Analysis, And Highways, McGrawHill Publishers.
5. M.Y. Shahin, Pavement Management for Airports, Roads, and Parking Lots, 2nd Edition, Springer.

REFERENCE BOOKS/OTHER READING MATERIAL

1. Athanassios Nikolaidis, Highway Engineering: Pavements, Materials and Control of Quality, 1st Edition, CRC Press
2. E. Ray Brown, Hot Mix Asphalt Materials, Mixture Design and Construction, 3rd Edition, NAPA Publications, USA
3. Asphalt Institute, MS-4 The Asphalt Handbook, 7th Edition, ISBN: 9781934154274, USA.

COURSE CODE	COURSE NAME	COURSE CATEGORY	CREDITS			
			L	T	P	C
CE 404	Introduction to Structural Dynamics	TE	3	0	0	3

UNIT I

Dynamics of Structures: Objectives and importance. Types of dynamic loads, Dynamic degree of

freedom, Mathematical modeling, Damping and stiffness, Torsional stiffness, Equivalent stiffness, Free and forced vibrations.

UNIT II

Single Degree of Freedom (SDOF) Systems: Undamped free vibrations, formulation of differential equation of motion: Newton's law of motion, D'Alembert's principle and energy approach. Natural frequency. Vibration response.

UNIT III

Single Degree of Freedom (SDOF) Systems: damped free vibrations, critically damped, under damped & over damped systems, formulation of differential equation of motion: Natural frequency. Vibration response.

UNIT IV

Forced vibration response of SDOF damped and undamped systems to harmonic loading, rotating and reciprocating unbalance, support motion and impulsive type forcing function. Vibration isolation and transmissibility. Seismic Instruments.

UNIT V

Vibrations of two degree of freedom systems, matrix formulation of equations of motion, principal modes of vibrations. Extension of the concept to MDOF systems. Introduction to Rayleigh's principle, modal analysis.
